## **Federation-wide National Society Response Plan**

### **MGR65002 Ukraine and impacted countries crisis Emergency Appeal**

*Winter assistance distributions for refugees and host families by the Moldova Red Cross volunteers. Source: Moldova Red Cross*

Emergency appeal No: [MGR65002](#)

Timeframe of this response plan: February 2022-December 2025

Number of people to be assisted: 150,000

**Federation-wide funding requirement: 39,700,577 CHF**  
**IFRC Secretariat funding requirement: 39,502,804 CHF**

# EXECUTIVE SUMMARY / TRANSITION STRATEGY

Under the current response, the MRCS is going to provide assistance via three main pillars: Food & Water, Health & Care, sanitation and hygiene services (WASH), integrated assistance support (which includes Shelter, Housing and Settlements, Livelihoods, and multi-purpose cash assistance, with the establishment and scaling up of Humanitarian Service Points, and protection and prevention while taking into account the seasonal constraints. The actions will target both displaced people from Ukraine and vulnerable host communities, aiming at preventing tensions, and community conflict as well as promoting social cohesion.

With the support of IFRC and other RCRC Movement partners, the MRCS will be engaged in annual seasonal support (summer and winter) combining both in-kind and cash and voucher assistance distributions, for already in-country is placed people and vulnerable host communities. It will expand its capacity across multiple trajectories to prepare for potential crises and to help develop its domestic disaster management programme. The MRCS plans to extend humanitarian services undertaken in response to the refugee crisis and strengthen the already shown capacity in distributions, further supporting a solid base for disasters and emergency management in the future. Coverage of basic needs through the distribution of household items (including blankets and towels, hygienic sets, and inter clothing) and food is a priority for the MRCS.

The IFRC is also supporting MRCS to enhance its capacities for responding to the expected high influx of displaced people from Ukraine and expand the outreach of assistance at the most transited Border Crossing Points. The IFRC will foster Moldova Red Cross's resources and capacities to set up Humanitarian Service Points and Mobile Emergency Units where the MRCS will provide diverse comprehensive services, including the provision of household items and improved migrants' kits to support "people on the move".

The continued CVA programme is expected to respond to the needs of the Ukrainian refugees, with a focus on seasonal adaptation (summer and winter). The programme will continue to integrate cash activities with other cross-sector areas such as Protection, Gender and Inclusion (PGI) and Community Engagement and Accountability (CEA). The MRCS will expand the CVA capacities and expertise on sectorial CVA, such as Cash for Health to support refugees and host communities in meeting their health needs. The National Society Development (NSD) plan will be focused on strengthening and long-term investment in the capacity building of the MRCS, with many core business practices of support. Strengthening its institutional capacity to ensure sustainability beyond the Ukraine response is another area of focus and MRCS will be able to do it with the assistance of Movement and non-Movement partners.

# NEEDS ASSESSMENT AND TARGETING

## Humanitarian impact of the crisis and resulting needs

### Refugees, Border Crossings and National Society Priorities Moldova

#### Border Crossings

— Border Crossings from Ukraine — Border Crossings to Ukraine

#### Refugees

— Individual Refugees from Ukraine

Data Source: IFRC, UNHCR; Date Produced: 2/10/2023  
Disclaimer: This figure reflects cross-border movements (and not individuals). Movements back to Ukraine can be pendular, and does not necessarily indicate sustainable returns as the situation across Ukraine remains highly volatile and unpredictable

The escalation of hostilities in Ukraine since February 2022 caused mass displacement of people internally and across international borders. As of 10 January 2023, 667,913 refugees have fled from Ukraine to the Republic of Moldova. As of 9 March 2023, there are 107,728 registered refugees in the Republic of Moldova.<sup>1</sup>

Due to the destruction of the Ukrainian energy system, the Republic of Moldova experienced massive power outages throughout the country. Since the beginning of November, new tariffs for electricity were approved by the National Agency for Energy Regulation, based on the requests received immediately after the announcement that the *Moldavskaya GRES* power station (owned by the Russian company), could no longer supply electricity to the Republic of Moldova since energy was purchased for expensive prices.

The National Bureau of Statistics announced in the middle of November that the annual inflation rate reached 34.62 per cent. Average consumer prices increased by 31.4 per cent including food products by 33.1 per cent, non-food goods by 21.2 per cent and services provided to the population by 44.7 per cent which caused a stir and the biggest concern to the citizen of the country. Government representatives announced that over 700,000 citizens, who submitted applications for government support, were assigned degrees of energy vulnerability. Thus, 78 per cent of all compensation applicants were classified as very vulnerable, 12 per cent as high vulnerability, 5 per cent as medium, 2 per cent as low, and 1 per cent as non-vulnerable.

<sup>1</sup> [UNHCR Operational Data, Ukraine Refugee Situation](#), 9 March 2023.

The National Employment Agency also announced on 27 January 2023, that 946 displaced people from Ukraine (689 women and 257 men), were officially employed in the labour field in the Republic of Moldova.<sup>2</sup>

### Profiles of most vulnerable groups

1. **Displaced people from Ukraine staying in Moldova:** Two-thirds of the refugee groups in Moldova are women and girls. 47,784 are minors. The most vulnerable groups are unaccompanied older adults, people with disabilities and chronic illnesses and pregnant women. The top three priority needs are around health (56 per cent) including MHPSS, food (55 per cent) and economic assistance (52 per cent)<sup>3</sup>. Needs for financial assistance increase seasonally, particularly to cover utility bills (winter and summer).
2. **Host communities in vulnerable situations, including hosting families:** The conflict in Ukraine has added additional pressure on an already strained Moldovan economy, which was struggling with limited resources and the compounding effects of a succession of recent shocks and stressors, including the COVID-19 pandemic and its consequences, and rising energy and fuel costs. Several groups within the population are either excluded or at high risk of social exclusion, including women, ethnic minorities (especially Roma), youth not in employment, people with disabilities and older adults. They face limited access to food and energy due to increased prices of commodities and a lack of money. The needs are increased over the winter season. 50 per cent of their income is spent on energy expenses in the winter months. According to [People in Need \(PIN\)](#) international NGO reports, 48 per cent of households have debts and only eight per cent of them have savings.

Considering the vulnerability of the country and the additional influx, public and local systems have challenges in covering and supporting displaced people from Ukraine and host communities' long-term needs. Constant inflows are stretching local capacities, which might result in limited services and increased tensions in the local communities. According to the Needs Assessment carried out in January 2023 by the IFRC and the Red Cross Society of the Republic of Moldova (MRCS), displaced people from Ukraine experience difficulties covering their basic needs such as healthcare, utility costs, accommodation, food, hygiene, and cleaning items. According to the [REACH report](#) for January 2023 refugee household priority needs are health 56 per cent, food 55 per cent, and economic assistance 52 per cent. They are at risk of increased indebtedness resulting in negative coping strategies which put them at risk. The winter intensifies those difficulties. Health needs were identified as not being fully covered, including costs of medicines, supplies, specialised examinations and tests, and specialised treatment, especially for people with chronic diseases. The rest of the population, in need of seasonal and/or intermittent healthcare, including specialised testing and prescribed medicines, is unable to cover the costs due to the limited household budget. Both displaced people from Ukraine and host communities are at risk of developing serious health conditions and increased suffering. Other needs include access to information on humanitarian assistance at the local level, as well as access to livelihoods and employability for which the target population faces language and cultural barriers.

### Prioritization: Needs and specific groups that National Societies in the country are responding to

The MRCS focuses on assisting both displaced people and host communities (including hosting families) presenting the highest vulnerabilities. Both groups are going to be covered by the MRCS with the support of partners to ensure that basic household needs including health and food commodities are met for the given target group.

The operational priorities for the timeframe of this response plan are focused on:

- Establishing **Cash and Voucher Assistance (CVA)** programmes, including multipurpose cash with a focus on seasonal support (summer and winter assistance) and Cash for Health, as well as during potential contingency situations and emergent displacement crises.
- Increasing **crisis preparedness** and capacity to cover **relief assistance** (food, and household items).
- Mainstreaming **Safeguarding, Protection, Gender, and Inclusion (PGI), and Community Engagement and Accountability (CEA)** considerations throughout all programs of the operation.

---

<sup>2</sup> National Employment Agency, Republic of Moldova.

<sup>3</sup> [REACH Report](#), January 2023.

- Ensuring coordination and complementarity of Movement members' actions in-country.

Aiming at scaling up operations to be able to better implement the response plan and other upcoming emergencies, the MRCS, with the support of IFRC and Movement partners, will also focus on the National Society Capacity Strengthening component (increasing organizational & administrative capacity at HQ & branch level, volunteer management development, creating Emergency Mobile Response Units (EMRUs), updating contingency planning document, logistics/procurement, finance, Planning Monitoring and Reporting systems development, and HR system establishment).

|-------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                       | <p>MoLSP through a MoU is being established at the moment in the context of the response plan's implementation.</p> <p>The MRCS has 16 regional branches, 504 primary organizations, 280,728 members and around 1,300 volunteers. Since the beginning of the operation, MRCS established donation points, provided food and household items to displaced people coming from Ukraine at Humanitarian Service Points, and paid regular visits to Refugee Accommodation Centres (RACs), provided psychosocial support, activities for children, helped the local staff to prepare food, and contributed to integration activities.</p> <p>The MRCS aligned to the Government of Moldova's winter top-up efforts to provide cash assistance to displaced people from Ukraine in the most vulnerable situations as well as to strengthen the support to host families with the provision of food parcels, hygienic sets, sanitisers, water filters, cartridges, winter clothing, etc. Local branches were involved in distributing humanitarian aid offered by the ICRC in term of food and hygiene packages for host families.</p> |
| <b>Key areas of scale-up and strength</b>             | <p>In responding to the needs of people in Moldova, the MRCS, IFRC, and other Movement partners are strongly focused on coordinating their efforts, strengthening the long-term sustainability and capacities of the MRCS, and preparing for both current and future emergencies. This operation allowed the MRCS to increase their volume of relief assistance through in-kind distributions and CVA.</p> <p>The organisational capacities of the MRCS remain in need of strengthening and long-term investment, with many core business practices in need of support. Thus in addition to addressing the needs of people fleeing Ukraine and host communities, this operation is an opportunity for significant capacity strengthening.</p> <p>MRCS has bilateral agreements with Movement partners and is in the process of expanding and strengthening its partnership relations with national and local authorities.</p>                                                                                                                                                                                                  |
| <b>Areas of new / additional capacities developed</b> | <p>Since the start of the operation, the MRCS mainly provided in-kind assistance (food and household items) along with the provision of psychosocial support (PSS) and psychological first aid (PFA). From December 2022 to February 2023, cash assistance was introduced to the MRCS and implemented via the established IFRC system. Since January 2023, the MRCS is implementing a Voucher Assistance programme for vulnerable people from Moldova, with the support of the Swiss Red Cross. This was an opportunity to learn how to design and implement voucher assistance.</p> <p>Strengthening institutional capacities to ensure sustainability beyond the current response is another area of focus for MRCS with the assistance of Movement and non-Movement partners.</p>                                                                                                                                                                                                                                                                                                                                           |
