

# MALAYSIA

IFRC network mid-year report, January – June 2023

23 November 2023

## IN SUPPORT OF THE MALAYSIAN RED CRESCENT SOCIETY

MALAYSIAN RED CRESCENT

**168**

National Society branches

**150**

National Society staff

**230,000**

National Society volunteers

## PEOPLE REACHED

Disasters and crises

**586**

Health and wellbeing

**18,438**

Migration and displacement

**5,530**

## FINANCIAL OVERVIEW

*in Swiss francs (CHF)*

<b>Total</b>	Funding requirements		3.9M
	Income		1.9M
<b>IFRC</b>	Longer-term Funding requirements		2.2M
	Funding requirements		700,000
<b>Participating National Societies</b>	Income		525,000
	Funding requirements		1M
<b>Host National Society other funding sources</b>	Income		572,000

Appeal numbers **MAAMY002**

## STRATEGIC PRIORITIES

<b>Climate</b>	People reached with activities to address rising climate risks	Applicable data not available
	People reached per year with support services, in-kind, cash and voucher assistance for emergency response and recovery	586
<b>Disasters and crises</b>	People reached with disaster risk reduction	38
	People reached with livelihoods support	Applicable data not available
<b>Health and wellbeing</b>	People donating blood	 18,000
	People reached with contextually appropriate health services	 6,000
	People reached with immunization services	 5,000
	People trained in first aid	447
	People reached with contextually appropriate water, sanitation and hygiene services	32
	People reached with psychosocial and mental health services	Applicable data not available
	<b>Migration and displacement</b>	Migrants and displaced persons reached with services for assistance and protection
	People reached by protection, gender and inclusion programming	Applicable data not available
<b>Values, power and inclusion</b>	People reached by National Society educational programmes	Applicable data not available
	Community Engagement and Accountability is integrated and institutionalized in the National Society policies, operations, and procedures (with clear benchmarks)	Yes

## ENABLING FUNCTIONS

<b>National Society Development</b>	All volunteers are covered by health, accident and death compensation	Yes
	Youth engagement strategy is developed or in place	Yes
<b>Humanitarian diplomacy</b>	Domestic advocacy strategies are developed, aligning, at least in part, with global IFRC advocacy strategies	Applicable data not available
<b>Accountability and agility</b>	National Society has demonstrated progress in digital transformation according to the digital maturity model outlined in the IFRC Digital Transformation Strategy	Yes
	National Society has strengthened integrity and reputational risk mechanisms	Applicable data not available

# OVERALL PROGRESS

## Context

Malaysia started the year 2023 with persistent rain and a major flood that affected seven states, with three states most badly impacted (Kelantan, Terengganu and Johor). Malaysia's Meteorological Department (MetMalaysia) predicted that the northeast monsoon period would begin on 7 November 2022, which was earlier than expected and would continue until March 2023. The prediction materialized and the flood, which was the result of earlier northeast monsoon rains, continued through to March 2023. As of March 2023, there had been four fatalities, and more than 113,180 people had been forced to leave their homes for safe shelter in relief centres.

In April, MetMalaysia issued heat wave alerts in several states. The highest temperature recorded was 38.4°C in Negeri Sembilan. On 25 April, an 11-year-old boy and a 19-month-old toddler died of heat stroke and severe dehydration in Kelantan and at least five people required medical treatment due to the heat. In May, the Education Ministry announced that all outdoor activities in schools would be suspended due to the heat and students would be permitted to wear casual clothing instead of school uniform. The national meteorological department stated the country's heat wave was expected to last until June. On 16 May, the Deputy Prime Minister stated that there were no immediate plans to declare the heat wave an emergency, but that MetMalaysia would continue to monitor the temperature and classify districts based on a three-day average temperature and that the government would declare an emergency if necessary.

The Malaysian Ministry of Health (MoH) reported 43,619 dengue fever cases up until 21 May 2023, an increase of 170 percent compared to the same period in 2022 (16,144). In addition, a total of 28 deaths due to dengue fever complications was reported compared to nine (9) deaths for the same period in 2022. The MoH Crisis Preparedness & Response Center (CPRC) has activated a Dengue monitoring portal since December 2022. Health officials also reported 131 chikungunya cases to date this year. Various control activities have been carried out by the Ministry of Health to reduce the incidence of dengue and other arbovirus cases.

On 4 May 2023, the World Health Organization announced that COVID-19 was no longer considered a public health emergency of international concern (PHEIC). Following the WHO announcement, the MoH announced that COVID-19 would no longer be considered a public health emergency in Malaysia. The Government of Malaysia (GoM) declared that COVID-19 was now "endemic" in Malaysia, but continued to encourage residents to take booster doses and to continue to wear facemasks on public transport and in healthcare facilities. Then in mid-June, the GoM revised its COVID-19 Standard Operation Procedures (SOPs) and eliminated requirements to wear facemasks on public transport and in healthcare facilities and reduced the quarantine period from seven to five days as of 5 July. The MoH extended the Malaysia's status as a local "infectious endemic area" from 30 June through to 31 December 2023.

People movement into Malaysia continues, as the country is still a major destination for migrants, including for migrant workers, asylum seekers and refugees who hope to be resettled in third countries. As of 2022, there were around 2.2 million documented migrant workers in Malaysia, as reported by the Malaysian Department of Statistics. Unofficial estimates of undocumented or irregular migrants range from a further 1.2 to 3.5 million - thus making Malaysia one of the largest migrant-receiving countries in southeast Asia. As of the end of June 2023, there were some 181,560 refugees and asylum-seekers registered with UNHCR in Malaysia. The vast majority (8 per cent) are from Myanmar, comprising Rohingya, Chin and other ethnic groups. The Rohingya group makes up 58 per cent or 105,760 of the total refugee population in Malaysia. The remaining refugees originate from countries including Pakistan, Yemen, Syria, Somalia, Afghanistan, Iraq and Sri Lanka, among others. Migrant needs remain the same as per the Migrant Needs Assessment results from the previous year.

## Key Achievements

- **The Malaysian Red Crescent Society** finalized and endorsed its Strategy 2030 (S2030) in June 2023, after a long internal consultation process to develop the Strategy
- Malaysian Red Crescent successfully received IFRC Capacity Building Fund (CBF) money for its financial sustainability work and to develop a road map for resource mobilization. A total of CHF 50,000 was received and the activities will be supported through until the end of September 2023
- The IFRC Malaysia delegation supported Malaysian Red Crescent to access funding support from the Italian Red Cross, for its Humanitarian Field School (HFS) based in Kelantan. The amount of funding received was EUR 50,000 (CHF 47,922) for the National Society to conduct a market study of business potential for the HFS and to equip the school
- In the first half of 2023, Malaysian Red Crescent was requested by the National Disaster Management Agency (NADMA) to submit a proposal on a Community Based Disaster Risk Reduction (CBDRR) project for one year to a value of MYR 1 million (CHF 189,137). The IFRC Malaysia delegation supported Malaysian Red Crescent in developing this CBDRR proposal. Approval for this proposal was granted in June 2023, with the Project Agreement to be signed in July 2023. This project will start in Q3 2023.

## Changes and amendments

As of now, there have been no changes nor amendments to the Malaysian Red Crescent Unified Plan for 2023.

# IFRC NETWORK ACTION

## STRATEGIC PRIORITIES

### Climate and environment

**Outcome:** *Communities and Red Cross and Red Crescent staff and volunteers undertake urgent action to adapt to rising and evolving risks from climate and environmental crises*

Under this Priority, Malaysian Red Crescent started by developing the knowledge and capacity of its staff and volunteers in two areas, which are on the Road Map to Community Resilience through enhanced Vulnerability Capacity Assessments (R2R via electronic Vulnerability and Capacity Assessment (e-VCA) and through Working with Natural Based Solutions (NBS). One staff and one volunteer participated in a Regional Training of Trainers (ToT) on R2R via e-VCA training and two staff and one volunteer participated in a Regional ToT Working with NBS training in May 2023. Following up on these training sessions, Malaysian Red Crescent trained staff and volunteers will conduct this training for more staff and volunteers in quarters three and four of 2023. Both trainings were organized by the IFRC Asia Pacific Regional Office.

With the support of the IFRC, Malaysian Red Crescent is in the process of setting up a potential partnership with World Wildlife Fund (WWF) Malaysia in the areas of Climate Change and the Environment. This partnership is a follow up to the Global Partnership between IFRC and WWF that had been signed in 2022. The area of partnership is not yet defined, but both Malaysian Red Crescent and WWF Malaysia have shown an interest in this partnership. A follow up workshop will be arranged in the third quarter of 2023 to formalize the partnership.

**Outcome:** *Communities take action to increase their resilience to evolving and multiple shocks and hazards*

**Outcome:** *People affected by crises and disasters have their needs met through access to assistance and support that is timely, adequate, flexible and strengthens their agency*

**Outcome:** *National Societies respond effectively to the wide spectrum of evolving crises and disasters, and their auxiliary role in disaster risk management is well defined and recognized*

Under this Priority, Malaysian Red Crescent implemented emergency response activities for floods during the period between December 2022 to March 2023. The National Society received a DREF allocation from the IFRC of CHF 500,000 to support the affected states. At the same time, Malaysian Red Crescent also received funds from local fundraising in both cash and in-kind (amount not yet shared with IFRC). The IFRC Malaysia delegation supported the National Society to manage this DREF, from the development of the Emergency Plan of Action (EPoA) to the technical support for the implementation. This DREF operation was completed by 30 June 2023.

In this first half of 2023, Malaysian Red Crescent received funding from the QBE Insurance Company Malaysia to a total of MYR 25,000 (CHF 4,782) to implement other CBDRR projects in Kelantan. The proposal development was supported by the IFRC Malaysia Delegation. This project targeted two communities in Kelantan State. The CBDRR project was done as a pilot project of the Malaysian Red Crescent, with the aim of scaling up CBDRR activities in the communities from 2023.

During the first half of 2023, Malaysian Red Crescent was requested by NADMA to submit a proposal in support of a CBDRR project for a one-year timeframe for MYR 1 million (CHF 189,137). The IFRC Malaysia delegation supported the National Society to develop this CBDRR proposal. The approval for the proposal was granted in June 2023 and the Project Agreement will be signed in July 2023. This project will start in the third quarter of 2023.

The IFRC Malaysia delegation supported the National Society to receive funding support from the Italian Red Cross, for its Humanitarian Field School (HFS) based in Kelantan. The amount of funding received was EUR 50,000 (CHF 47,922) for Malaysian Red Crescent to conduct a market study of business potential for the HFS and to equip the school.

Malaysian Red Crescent's Cash Readiness plan faced some challenges in progressing and in finalizing its Cash and Voucher Assistance (CVA) standard operating procedures and its selection of Financial Service Provider (FSP) process. Due to this, the National Society lost its CVA Coordinator in January 2023 and recruitment of the replacement has taken a long time. Recently, Malaysian Red Crescent has appointed a new CVA Coordinator who is mainly focused on supporting the floods emergency response as a priority and the National Society is prioritizing the finalization of the CVA SOPs and the FSP selection process in the third quarter.

The IFRC's Asia Pacific Regional Office sent the new Malaysian Red Crescent CVA Coordinator to Vanuatu as part of surge deployment for two months from (June to August 2023, to support the Vanuatu Red Cross to set up its CVA activities. This deployment has built the confidence of Malaysian Red Crescent CVA Coordinator and has been motivating in moving forward the National Society's own Cash Preparedness Plan.

To meet priorities around improving its response readiness, Malaysian Red Crescent has continued to improve its Emergency Operations Centre (EOC). The IFRC Malaysia delegation and IFRC global Disasters, Crises and Climate (DCC) team provided technical support to Malaysian Red Crescent to help in starting internal discussions on the improvement plan, which included EOC training. National Society staff and volunteers from headquarters and state branches both participated in the online EOC virtual training - this EOC virtual training was supported by a contribution from the IFRC's Americas Regional Preparedness Centre and United States Agency for International Development (USAID). A follow up face to face training and an EOC procedures development workshop will be held in July 2023.

In the first six months of 2023, Malaysian Red Crescent has actively started to engage more with the relevant government agencies, including the National Disaster Management Agency (NADMA), the Meteorology Department of Malaysia (MetMalaysia), and the Ministry of Health (MoH). This work has helped the National Society to improve the effectiveness of coordination during its response activities and to further develop its preparedness activities plan. The National Society will continue this engagement with more follow-up discussions with the relevant agencies on potential preparedness activities.

Malaysian Red Crescent has been supported by the IFRC Asia Pacific Regional Office Civil Military Relations (CMR) focal point in building up the relationship with the Malaysian Armed Forces (MAF), which has led to an invitation for the National Society to participate in the national Five Power Defence Arrangements (FPDA) exercise. IFRC provided technical guidance on how to deal with MAF and on the National Society's preparations to take part in the FPDA exercise, which is scheduled for October 2023.

## Health and wellbeing

---

**Outcome:** *National Societies capitalize on their auxiliary role to ensure their position on relevant country-level public health strategy, advocacy, and policy platforms, and mechanisms*

**Outcome:** *The health and wellbeing of communities are protected and improved through access to sustainable, affordable, appropriate, and quality health services across the life course*

**Outcome:** *The health and dignity of communities in emergencies are maintained by providing access to appropriate health services*

**Outcome:** *Communities have increased access to affordable, appropriate and environmentally sustainable water, sanitation and hygiene services*

**Outcome:** *Communities at risk from pandemics and epidemics have increased access to affordable, appropriate and environmentally sustainable water, sanitation and hygiene services*

In this first half 2023, Malaysian Red Crescent continued its COVID-19 vaccination activities and vaccinated 4,859 people. This work was funded by the Australian Government through Australian Red Cross. The project also included Risk Communication and Community Engagement (RCCE) activities, that reached over 20,000 people, who received information and awareness of COVID-19 from the RCCE activities. The National Society has received AUD 765,375 to date as a funding commitment for this project and the work has been extended to September 2023. Malaysian Red Cross successfully closed its COVID-19 response in December 2022 and submitted its final report to IFRC. The National Society participated in the global lesson learning exercise on COVID-19, providing data on Malaysia to contribute to the research.

Malaysian Red Crescent is carrying out on-going mobile clinic activities targeted towards migrants and vulnerable families in Malaysia. This is funded by the International Committee of the Red Cross (ICRC) for a total of CHF 100,000. This project assisted 4,859 people who all received relevant health services. During this project, the National Society has been coordinating with different agencies, including Mediciens Sans Frontier (MSF), the United Nations High Commission for Refugees (UNHCR), and other local agencies.

During the flood response, Malaysian Red Crescent also received support from Singapore Red Cross to provide mental health and psychosocial support services (MHPSS) services to the flood affected people in Johor State and received water, sanitation and hygiene (WASH) equipment to support the response in Johor.

The IFRC Malaysia delegation supported Malaysian Red Crescent in developing a proposal for a "Stockpile" project funded by the Japanese Government, with estimated funding of USD 1.8 million over two years. The project has been approved but is still pending the signing of an agreement between the IFRC and the donor.

Malaysian Red Crescent also received funding from the Japanese Red Cross through the IFRC APRO WASH unit, to conduct two WASH trainings in 2023, for a total of CHF 17,000 and the National Society will start these training activities in the third quarter of 2023.

Malaysian Red Cross is planning to develop its Epidemic Preparedness Plan in quarter three of 2023 and has been working with the Crisis Preparedness and Response Centre (CPRC) of the Ministry of Health (MoH) to support this work. The National Society is planning to conduct a workshop to kick-start the development of the Epidemic Preparedness Plan shortly.

## Migration and displacement

---

**Outcome:** *Migrants and displaced persons have access to humanitarian assistance and protection at key points along migratory routes as well access to durable solutions when appropriate*

**Outcome:** *National Societies are able to engage with migrants, displaced persons and host communities to more effectively assess, understand and respond to their priority needs*

Under this Strategic Priority, Malaysian Red Crescent has been progressing with the development of its Migration and Displacement Policy and Strategy and has been working with a consultant, who is supporting the National Society to develop these two documents. The consultant is funded by the IFRC and IFRC also supported the recruitment process. The development of the Migration Policy and Strategy will be completed by September 2023.

The National Society is also moving forward with the recruitment of a Senior Officer for Migration and Displacement, who will lead the Migration and Displacement agenda of Malaysian Red Crescent. The selected candidate will start in early August 2023. The position is funded by both the IFRC and the ICRC, who are continuously providing technical support for Malaysian Red Crescent on its Migration and Displacement work. A Red Cross Red Crescent Movement Migration and Displacement working group continues to be active and will pick up on the work once the position of Senior Officer for Migration and Displacement is in place.

The IFRC Malaysia delegation, with support from the IFRC Asia Pacific Regional Office Regional Migration and Displacement Coordinator, has facilitated links between the National Society and MSF Malaysia, to ensure a better coordination around migration support, particularly in the areas of health support.

The IFRC Malaysia delegation also continues to support the Malaysian Red Crescent Chairman in taking on more participation and involvement at both a regional and global level, such as in the Global Migration Leadership Working Group and the Regional Migration Network.

## Values, power and inclusion

---

**Outcome:** *The IFRC and National Societies contribute to a positive change in communities through wider understanding, ownership, dissemination and application of Fundamental Principles and humanitarian values, focusing especially on young people's knowledge, skills and behaviour*

**Outcome:** *The IFRC and National Societies promote and support safe, equitable and continuous access to quality education for all, especially boys and girls affected by disaster, crisis or displacement*

**Outcome:** *IFRC and National Societies are safe and inclusive organizations, where ensuring dignity, access, participation, and safety for people of all identities is central to all that we do*

**Outcome:** *People and communities, vulnerable to and affected by crises, are empowered to influence decisions affecting them and trust the Red Cross and Red Crescent to serve their best interest*

Malaysian Red Crescent gave specific attention to its Protection, Gender, and Inclusion (PGI) work in the first half of 2023. A number of trainings were conducted to inform National Society staff and volunteers on PGI issues, including a Child Protection Training, a Sexual and Gender Based Violence (SGBV) training and a general PGI awareness raising training conducted by the IFRC's PGI technical focal point. The latter two trainings (on SGBV and PGI) were presented during the National Council meeting in June 2023.

In practice, Malaysian Red Crescent applied a Child Safeguarding Risk Analysis to their floods response activities and will apply this Child Safeguarding Risk analysis to all their new programming activities.

Malaysian Red Crescent submitted a proposal to the Prudential through the IFRC to set up a pilot project on the Safe Steps Kids (SSK) and to roll this out to schools. The project is expected to start in the third quarter of 2023, with estimated funding of CHF 10,000. The National Society is also exploring the opportunity to pilot another programme,

the “Edu Plus” project, where they would like to introduce a humanitarian education curriculum to selected schools in Malaysia. This project is still in discussion and is expected to start in quarter four.

Malaysian Red Crescent participated in an Asia Pacific Youth Mobilization Summit in Kuala Lumpur, which was supported by the IFRC. This summit was attended by different organizations (the Scouts, Girl Scouts, YMCA, Duke of Edinburgh’s Award, and Red Cross Red Crescent) to exchange their values/priorities and to discuss how best they can collaborate to maximize their impact.

## ENABLING LOCAL ACTORS

### Strategic and operational coordination

Malaysian Red Crescent finalized and endorsed its Strategy 2030 (S2030) in June 2023, after a long internal consultation process to develop the Strategy. The next step will be for the National Society to prioritize the follow-up to the endorsement of the Strategy and to develop its two-year Operational Plan in quarter three of 2023.

Malaysian Red Crescent received Capacity Building Fund (CBF) funding to help improve its financial sustainability and to develop a road map for resource mobilization. It received a total of CHF 50,000 from the Fund and the activities will be implemented through until the end of September 2023. The National Society has recruited a Resource Mobilization Manager and has fully funded this position.

Malaysian Red Crescent organized a Red Cross Red Crescent Movement Coordination meeting, which was attended by representatives of the IFRC, ICRC, Italian Red Cross, and the Singapore Red Cross. Previously, there was less involvement from the Participating National Societies (PNS) based in Kuala Lumpur, but now the National Society is working to include all those PNS based in Malaysia. The National Society has requested the IFRC and the ICRC to provide a Movement Induction for its National Council in June 2023. Previously, similar Movement Inductions were provided to Malaysian Red Crescent Governing Board Members in 2022.

### National Society development

Malaysian Red Cross received an extension of support for its Red Ready project on CVA until December 2023. The focus areas of this project are still as per the agreed seven themes of the Red Ready Framework. The National Society is also in the process of developing a new proposal for Phase III of the Red Ready project, which is proposed to be starting from January 2024 and running through to December 2025. The IFRC has supported all of the phases of this process.

The National Society also participated in a Global Communication Forum, in which the National Committee’s Chairman of Communications and IT and the National Society’s Communications Manager were profiled in this Movement Communications Forum. This engagement supported Malaysian Red Crescent to commit to improving its Communications Strategy.

The Malaysian Red Crescent Secretary General has been briefed on the updated status of the Organizational Capacity Assessment and Certification (OCAC) of the IFRC and the National Society has expressed its interest to review its OCAC status through an internal process to look into their current NSD activities, including those under the Red Ready project and the Preparedness for Effective Response (PER) framework and methodology. At the same time, the National Society is continuing with its Branch Organizational Capacity Assessment (BOCA) exercise, as part of its commitment on its Branch Development activities.

Malaysian Red Crescent deployed its CVA Coordinator, as part of the IFRC's Surge deployment system, to support the Vanuatu Red Cross to start up CVA activities in Vanuatu. The deployment was for two months.

## Humanitarian diplomacy

---

Malaysian Red Crescent is currently in the midst of conducting an auxiliary role mapping exercise in Malaysia, which is supported by an external consultant. The consultant recruitment was funded by both the IFRC and the ICRC. The consultant will help the National Society to review its current auxiliary roles and to make concrete recommendations to make the roles more relevant and effective in future. The work will be completed by the end of quarter three.

The National Society has actively started to engage with different Ministries, to brief them on the National Society's current auxiliary roles and on its work to provide humanitarian response activities in Malaysia. Some of the Ministries and Agencies that the Malaysian Red Crescent has been engaged with include: the Ministry of Home Affairs, Ministry of Health, Ministry of Finance, Ministry of Youth and Sports, Ministry of Women, Ministry of Defence, and NADMA. This is part of the National Societies efforts to improve the government's understanding of Malaysian Red Crescent's roles and activities alongside and in support of those Ministries and Agencies.

## Accountability and agility (cross-cutting)

---

The National Society has had several discussions with the IFRC's Membership and Governance teams to support its plan to form a Compliance and Integrity Committee, and to set up an integrity hotline. This is an ongoing process, with the aim to have an integrity hotline set up by the end of 2023 and to be in use by 2024.

Malaysian Red Crescent also received funding from the Capacity Building Fund (CBF) to support its work on digitalization, and to help it improve its levels of connectivity and digital communications. CHF 26,800 was received and used to improve its conference communications equipment. This project was completed by the end of June 2023.

**The International Federation of Red Cross and Red Crescent Societies (IFRC)** is the world's largest humanitarian network, with 191 National Red Cross and Red Crescent Societies and around 15 million volunteers. Our volunteers are present in communities before, during and after a crisis or disaster. We work in the most hard to reach and complex settings in the world, saving lives and promoting human dignity. We support communities to become stronger and more resilient places where people can live safe and healthy lives, and have opportunities to thrive.

## DATA SCOPE AND LIMITATIONS

- **Timeframe and alignment:** The reporting timeframe for this overview is covering the period from 1 January to 30 June 2023. However, due to the diversity of the IFRC and differences in fiscal years, this coverage may not fully align for some National Societies. Mid-year reporting data may have been based on estimations, with plans to submit more robust numbers at the annual reporting stage.
- **Missing data and breakdowns:** National Societies have diverse data collection systems and processes that may not align with the standardized indicators. Data may not be available for some indicators, for some National Societies. This may lead to inconsistencies across different reporting tools as well as potential under or over-estimation of the efforts led by all.
- **Reporting bias:** The data informing this Federation-wide overview is self-reported by each National Society (or its designated support entity) and which is the owner and gatekeeper, and responsible for accuracy and updating. IFRC tries to triangulate the data provided by the National Societies with previous data and other data in the public domain.
