Appeal number **MAAZM002**

## STRATEGIC PRIORITIES

	People reached with disaster risk reduction	7,000
<b>Disasters and crises</b>	People reached with livelihoods support	174
	People reached per year with support services, in-kind, cash and voucher assistance for emergency response and recovery	174
<b>Health and wellbeing</b>	People reached with contextually appropriate health services	1M
	People reached with psychosocial and mental health services	328,000
	People reached with immunization services	184,000
	People reached with contextually appropriate water, sanitation and hygiene services	44,000
	People trained in first aid	364
<b>Migration and displacement</b>	Migrants and displaced persons reached with services for assistance and protection	6,000
<b>Values, power and inclusion</b>	People whose access to education is facilitated through National Society programming	354
	Percentage of people surveyed who report receiving useful and actionable information	95%

## ENABLING FUNCTIONS

	National Society is adopting national community engagement/accountability strategies, policies or frameworks	Yes
<b>Strategic and operational coordination</b>	Number of branches that have the capacity to lead the operation at local level	40
	Number of government led coordination platforms the National Society is part of	5
	National Society has in place capacities to conduct Emergency Needs Assessment	Yes

## ENABLING FUNCTIONS (CONT.)

### National Society Development

National Society has National Disaster Response teams trained and management systems in place Yes

National Society has revised or developed its contingency plan Yes

National Society has demonstrated progress in digital transformation according to the digital maturity model outlined in the IFRC Digital Transformation Strategy Yes

### Accountability and agility

National Society has functioning data management systems that inform decision making and support monitoring and reporting on the impact and evidence of the IFRC network's contributions Yes

National Society has strengthened integrity and reputational risk mechanisms Yes

## IFRC NETWORK SUPPORTED ACTIVITIES

# OVERALL PROGRESS

## Context

Zambia is a landlocked and resource-rich country at the heart of Southern Africa. Key socio-political and economic events are shaping its trajectory. With a youthful population of 17.9 million and annual growth of 2.8%, the demand for jobs, healthcare, and services is intensifying. In 2020, the nation saw its first economic contraction since 1998, as the dual impact of persistent droughts and COVID-19 led to a 1.7% GDP decline. COVID-19's grip on the nation has eased, prompting a shift towards vaccination, targeting 70% of the population.

During this period, the local currency (Zambian kwacha) was volatile, while the cost of living stayed high, increasing levels of vulnerability among people. The depreciation of the kwacha decreased the available funds for projects budgeted in foreign currency. The country grapples with a debt crisis, characterized by high levels of debt servicing that outpace investments in education and health. Recent strides have been made to tackle this challenge, involving the International Monetary Fund.

Politically, Zambia's stability is underscored by regular democratic elections. The most recent polls, held in August 2021, resulted in a peaceful transfer of power to the seventh President, Hakainde Hichilema. His government introduced free education up to secondary level and expanded the healthcare workforce. However, public poverty persists, with 58% living below the poverty line. Urbanization exacerbates these issues, as employment opportunities lag population growth.

The country faces hazards like droughts, floods, and epidemics, such as cholera and typhoid. These events form the backdrop against which the Zambia Red Cross Society strives to implement its unified plan, addressing both immediate humanitarian needs and long-term development goals.

## Key achievements

During this period, the **Zambian Red Cross** Society continued to deliver its humanitarian services in emergency and developmental contexts, in line with the 2021-2025 strategic plan, focusing on Health and Care, Disaster Management and Risk Reduction, Branch Development and First Aid. The work of Zambian Red Cross was made possible through the technical and financial support from IFRC, ICRC and participating National Societies, including the Netherlands Red Cross, Italian Red Cross, American Red Cross, the Ministry of Health, and the Disaster Management and Mitigation Unit (DMMU), among other government bodies. Major activities include flood response, cholera outbreak in Eastern, Luapula and Northern provinces, COVID-19 interventions, implementation of developmental projects on maternal and child health, and branch strengthening.

Major outputs attained during this period included the following.

- 86,356 people reached during social mobilization through various media to create demand for COVID-19 vaccination
- 13,888 people reached with COVID-19 prevention and control messages
- 21 boreholes rehabilitated to enhance access to clean and safe water, reaching approximately 25,491 people
- 2 hand washing facilities constructed, reaching 21,551 people with the promotion of hand washing practice
- 45 volunteers trained in safe motherhood action groups (SMAG) to equip them with knowledge and skills in communication, safe motherhood, maternal and newborn health
- 120 volunteers deployed for social mobilization during child health week, reaching 13,746 children under five compared to the target of 14,304 (96.1% coverage)
- 183,887 people reached with sensitization on importance of child immunizations through various media
- 1,060 volunteers deployed for community engagement on cholera prevention and control
- 
- 1,044,604 people reached with varied cholera prevention and control interventions
- 18,916 persons reached with access to clean and safe water

- 28,976 households (173,856 people) reached with chlorine and other WASH supplies
- 30,301 households (123,810 people) reached during a cholera vaccination campaign
- 34 National Response Team members trained
- Cash distributed to 29 households in Mazabuka for a period of 3 months (K1500 per household)
- Internet and phone services provided to a total of 5,450 refugees in Mantapala and Maheba

Besides these achievements in programming, the National Society participated in various coordination mechanisms with state and non-state actors in the humanitarian field to create synergies and enhance complementarity. Several capacity building initiatives were undertaken internally within the National Society and Red Cross Red Crescent Movement. Further, the National Society participated in commemorating important days, which increased the visibility of the National Society.

The Zambia Red Cross is also implementing the Pilot Programmatic Partnership (PPP) funded by the Directorate-General for Civil Protection and Humanitarian Aid Operations of the European Union (ECHO). The partnership aims to strengthen the anticipatory action, preparedness and response of communities and the National Society. As a result, the Zambian Red Cross has improved its capacity in early action and cash and voucher assistance (CVA). Activating its updated flood Early Action Protocol (EAP), the National Society was able to provide a timely response to floods in this period, supporting 600 affected households with cash assistance. .

## IFRC NETWORK ACTION

### STRATEGIC PRIORITIES

#### Climate and environment

A drought Early Action Protocol (EAP) was developed and a flood EAP was revised with the support of the RP3 Project. The 2023 floods in Zambia underscored the urgent need for continued efforts in climate change mitigation and adaptation strategies. With extreme weather events becoming more frequent and intense due to climate change, collective action and proactive measures are crucial to building more resilient communities capable of confronting such growing threats.

In collaboration with the Ministries of Health and Education, and local government, the Zambia Red Cross implemented a solarization initiative, enhancing access to clean safe water and community well-being, and contributing to environmental sustainability. The project involved drilling and installing 2 solar mechanized boreholes in Kapiri Mposhi District. This endeavor considerably improved water availability for the communities, benefiting around 18,916 people (9,080 male and 9,836 female).

## Disasters and crises

During the first half of 2023, the Zambia Red Cross Society achieved significant milestones in its Disaster Risk Management (DRM) and emergency response initiatives under the RP3 project. One noteworthy achievement was the proactive activation of the flood Early Action Protocol (EAP) warning, accurately predicting floods in 10 districts across the country. The Zambia Red Cross promptly delivered targeted assistance to 21,000 households in Kafue and Kitwe districts, focusing on Water, Sanitation, and Hygiene (WASH), health, shelter, food security, livelihoods, and disaster risk reduction. This action aimed to mitigate anticipated flood impacts, such as displacement, waterborne diseases, food insecurity, and livelihood losses. Collaborative efforts among the government, communities, Zambia Red Cross, and volunteers effectively minimized flood-related damages.

Addressing the critical shelter and non-food requirements of the affected communities, the Zambia Red Cross demonstrated swift and decisive action through the Disaster Response Emergency Fund (DREF). By procuring essential materials such as tarpaulins, nails, soft wire, and construction tools, Zambia Red Cross facilitated the construction of 24 temporary cooking shelters across 18 camps in the targeted districts. Additionally, Zambia Red Cross extended aid by distributing 3,423 blankets and 4,227 sleeping mats, benefiting a total of 1,409 households.

In response to the critical needs of the affected and displaced individuals, Zambia Red Cross supported communities affected by floods in the Southern Province. Through the support of ECHO PPP, the Zambia Red Cross effectively provided assistance to 600 households, granting them 500 Zambian Kwacha (ZMW) per month over a span of three months, reflecting National Society's commitment to addressing the pressing needs of the affected communities.

<b>NAME OF OPERATION</b>	Zambia Flood – Early Action Protocol
<b>MDR-CODE</b>	MDRZM017
<b>DURATION</b>	24 January 2023 to 30 April 2023
<b>FUNDING ALLOCATION</b>	CHF 80,882
<b>PEOPLE TARGETED</b>	12,000
<b>LAST OPERATION UPDATE</b>	<a href="#">Zambia Flood DREF operation</a>

The Zambian Red Cross' RP3 project implementation showcased its disaster response commitment. Activation of the Flood Early Action Protocol demonstrated its proactive stance, and training programmes, standard operating procedures, and workshops enhanced disaster management practices. By prioritizing community engagement, Zambian Red Cross upheld Red Cross Red Crescent principles and ensured local participation and empowerment.

Prepositioned stocks, procured under various projects, including ECHO PPP, facilitated this timely response. The stocks have been replenished through support from IFRC flood DREF, ensuring ongoing readiness for future emergencies.

Moving forward, Zambian Red Cross continued to strengthen disaster response and community resilience. A CVA training in Choma equipped 15 Zambian Red Cross staff with skills for effective cash transfer interventions. The training standardized approaches to assessing cash-based interventions feasibility and market analysis. To address the immediate needs of the affected and displaced populace, the Zambia Red Cross meticulously devised a plan centered on extending support to the affected households. This support materialized through the provision of monthly unconditional cash grants. The Zambia Red Cross effectively assisted 600 households by disbursing 500 Zambian Kwacha (ZMW) per month for a duration of three months.

Zambian Red Cross volunteers and staff and government staff from each province, were trained as National Response Teams. This bolstered their technical preparedness for coordinating disaster reduction, response, and recovery efforts, aligned with Red Cross principles.

With support of the ECHO PPP, the Zambia Red Cross has increased its disaster management capacity. The National Society has a multi-hazard contingency plan to prepare and respond to floods, droughts, epidemics and population movement. To further enhance disaster management practices, the Zambian Red Cross has developed hazard

standard operating procedures and revised the flood Early Action Protocol to incorporate lessons learned and facilitate development of the drought Early Action Protocol, promoting coordinated, anticipatory actions.

The National Society, with support from IFRC and the ECHO PPP, supported individuals who had been adversely affected by floods in the Namwala, Mazabuka, and Monze Districts of Zambia's Southern Province. The primary objective of this operation was to provide multi-purpose cash assistance for food and basic necessities.

Monitoring visits in project areas identified food insecurity and water scarcity concerns due to common hazards. Zambia Red Cross addressed these by promoting community gardening and multi-purpose well digging. Risk Communication and Community Engagement (RCCE) training equipped stakeholders with skills to identify and communicate emerging epidemic risks.

Emphasizing CEA, the Zambia Red Cross identified focal points and facilitated training in Siavonga, Gwembe, and Sinazongwe districts, ensuring strong community involvement and decision-making throughout the project cycle.

The National Society sustained its commitment to two significant Disaster Risk Reduction (DRR) projects during the reporting period. The "Response Preparedness III" project, supported by the Netherlands Red Cross, operated in Siavonga, Sinazongwe, and Gwembe. Simultaneously, the ECHO PPP was implemented in Mazabuka, Choma, and Namwala districts of Southern Province. The following notable activities were carried out:

- A training session in Cash and Voucher Assistance (CVA) was conducted in Choma, with 24 Zambia Red Cross staff members participating
- The National Society undertook the identification of common hazards and their potential impact on 109 villages (1,158 households) in Siavonga, Gwembe, and Sinazongwe
- Thirty volunteers were trained in Risk Communication and Community Engagement (RCCE)

Zambia Red Cross successfully trained 34 National Disaster Response Team members in Kabwe, supported by both ECHO and RP3.

Through the Community Based Health and Resilience (CBHR) project with a specific focus on maternal and childcare, the National Society took is in the final stages of constructing a maternal shelter at Chikowa. This initiative aims not only to enhance maternal and child health but also to empower women, fostering their overall well-being.

## Health and wellbeing

---

### COVID-19 response

During this period, there was an upsurge in COVID-19 cases compared to the previous quarter. The Zambia Red Cross continued its interventions, focusing on Risk Communication and Community Engagement (RCCE), contact tracing, mobilizing for COVID-19 vaccination, and water, sanitation, and hygiene (WASH) in selected districts in Eastern, Southern, Copperbelt and Northwestern Provinces. The COVID-19 response was supported by the Netherlands Red Cross, Africa CDC, the Bureau for Humanitarian Assistance (BHA), and IFRC. The overall goal is to reduce the transmission of the disease, while protecting the safety, wellbeing, dignity, and livelihoods of the most vulnerable. Key outputs included:

- Collaborating with the Ministry of Health (MoH) to reach 86,356 people through social mobilization for COVID-19 vaccination
- Rehabilitating 21 boreholes to provide clean water to around 25,491 people
- Constructing two hand washing facilities, promoting proper hygiene among 21,551 individuals.

## Cholera response – DREF allocation

<b>NAME OF OPERATION</b>	Cholera Eastern Province – DREF allocation
<b>MDR-CODE</b>	MDRZM018
<b>DURATION</b>	2 February 2023 to 31 July 2023
<b>FUNDING ALLOCATION</b>	CHF 473,600
<b>PEOPLE TARGETED</b>	3,922,364
<b>LAST OPERATION UPDATE</b>	<a href="#">Zambia Cholera Eastern Province - DREF operation</a>

## Routine immunization strengthening

The 5-PP Project executed Phases 1, 2, and 3, aiming to enhance routine immunization. Actions involved identifying missed vaccinations, learning about immunization services, and aiding decision-making for improved coverage. Notable outputs were:

- Raising awareness among 183,887 people on child immunization’s significance through diverse media
- Training and deploying 336 volunteers for door-to-door visits, reaching 77,050 individuals, identifying unvaccinated children through interviews with caregivers and health workers

## Community Based Health and Resilient II (CBHR-2) Project

Zambia Red Cross continued the implementation of the second phase of the CBHR Project in Lusangazi District in Eastern Province focusing on interventions towards reducing maternal neonatal and child morbidity and mortality. The following are the outputs delivered:

- Training for 45 volunteers in SMAG to equip them with knowledge and skills in communication, safe motherhood, maternal and newborn health
- Initiated the process for the completing the mother’s shelter at Chikowa
- Deploying 120 volunteers for social mobilization during child health week, reaching 13,746 children under five compared to the target of 14,304 (96.1% coverage)

## Routine immunization strengthening

The 5-PP Project achieved notable milestones by raising awareness among 183,887 people on child immunization through diverse media. Volunteers conducted door-to-door visits, reaching 77,050 individuals, a significant achievement in bolstering routine immunization.

## IFRC network’s joint support of the National Society

- COVID-19 Response: Financial support from the Netherlands Red Cross, Africa CDC, and IFRC bolstered Zambian Red Cross’ response. By providing guidance, resources, and coordination, the IFRC and participating National Societies strengthened Zambian Red Cross’ capacity to manage the pandemic effectively
- Routine Immunization strengthening: Through technical expertise and funding, the IFRC and participating National Societies supported Zambian Red Cross in achieving the awareness raising and door-to-door outreach goals of the 5-PP Project. This collaborative approach ensured widespread immunization awareness and coverage.
- Cholera Response: With UNICEF and DREF backing, the IFRC and participating National Societies played a significant role in Zambian Red Cross’ cholera prevention initiatives. This collaboration enhanced community engagement, hygiene promotion, and effective cholera control measures.
- ECHO PPP is enhancing the National Society’s capacity in epidemic and pandemic preparedness and response. The content list of the cholera toolkit was completed. Handwashing stations, personal protective equipment, and the contents of cholera toolkits have been procured. Staff and volunteers have been trained in community-based health and first aid and carry out health promotion activities in communities.

- The exit strategy encompassed a deliberate transition of programme responsibilities to local communities and Zambian Red Cross branches, facilitated by comprehensive capacity building and stakeholder collaboration at National and District level.

## Migration and displacement

During this period, Zambia Red Cross remained committed to delivering critical Restoring Family Link (RFL) activities to refugees, achieving positive outputs that underscore the organization's dedication to reuniting families and aiding displaced individuals. Key accomplishments include:

- Facilitating the safe arrival of 375 refugees from the Democratic Republic of Congo (DRC) to Mantapala
- Providing essential internet and phone services to 5,450 refugees residing in Mantapala and Maheba settlements
- Actively engaging in a UNHCR-organized anti-fraud refresher workshop, contributing to enhancing fraud prevention measures
- Sustaining active involvement in monthly coordination meetings and inter-agency sessions, fostering collaboration, and streamlined efforts
- Marking the occasion of World Refugee Day through participation, shedding light on the global refugee crisis and advocating for support
- Playing a pivotal role in shaping the Movement Migration Strategy Draft Framework by contributing valuable inputs as part of the Lived Experience Advisory Group
- Bolstering the skills of Zambia Red Cross' Restoring Family Links Case Workers through targeted training sessions, equipping them with essential skills to effectively manage the Family Links Application (FLA) tool and support super users

These multifaceted efforts collectively reflected Zambia Red Cross' commitment to alleviating the challenges faced by refugees and displaced populations, focusing on reuniting families and providing vital services for their well-being.

The National Society continued to make progress in the area of migration and displacement, including facilitating the secure migration of 375 refugees from the Democratic Republic of Congo to Mantapala, while also providing crucial communication services to 5,450 refugees in Mantapala and Maheba. The National Society remained committed to other local stakeholders through the participation in a UNHCR-led anti-fraud workshop, contributing to fraud prevention. Engaging in regular coordination meetings and inter-agency sessions, which enhanced collaborative efforts, and their involvement on World Refugee Day highlighted the global crisis and the need for support. The National Society played a key role in shaping the Movement Migration Strategy Draft Framework and enhancing the skills of Restoring Family Links Case Workers through training.

## Values, power and inclusion

The National Society remained committed to integrating protection, gender, and inclusion (PGI) principles into its programs, with a special focus on the most vulnerable populations. Additionally, a Child Protection Policy is currently in development, aimed at advancing the agenda of promoting values, empowerment, and inclusive practices.

In the period under review, the Zambia Red Cross achieved considerable progress in CEA initiatives. Successful training under the ECHO PPP project led to enhanced understanding among 59 volunteers, 6 DDMC members, and 6 BEC members. This translated into the formation of CEA committees, the establishment of feedback systems, and the identification of focal point persons in 59 communities. Moreover, 617 volunteers were trained in CEA in several districts, during the Cholera DREF operation, resulting in the creation of community feedback mechanisms. This helped establish community feedback mechanisms and identified 5 CEA focal point persons. The successful launch of

the toll-free line (7373) added another layer of engagement, making it operational for inquiries and support, facilitating 109 instances of feedback reports, including on health concerns and gender-based violence. These accomplishments underscore Zambia Red Cross' commitment to robust community involvement and responsiveness.

Eleven meetings were held with 376 cash voucher assistance beneficiaries in Namwala district, where information on cash distribution and the National Society toll-free line was shared.

A total of 109 feedback submissions were received, including 54 through the toll-free line and 56 through face-to-face interactions. The feedback covered various issues, with a focus on health-related concerns.

In summary, Zambia Red Cross has made substantial strides in strengthening CEA, enhancing community engagement, and establishing feedback mechanisms, which contribute to improved communication and community participation across several districts.

## ENABLING LOCAL ACTORS

### Strategic and operational coordination

The Zambia Red Cross continued to strengthen engagement with partners within and outside the IFRC Network to work collectively on the key challenges facing communities both at national and branch level.

The National Society participated in various coordination mechanisms with state and non-state actors in the humanitarian field to create synergies and enhance complementarity. Several capacity building initiatives were undertaken internally within the National Society and the Movement. Further, the National Society participated in commemorating important days, which increased its visibility.

The National Society in various branches and at headquarters participated in commemorating the 2023 World Red Cross Day (WRCD) on 8 May under the theme "Everything we do, comes from the heart." This created a platform the National Society and global RCRC Movement to communicate to the world how emotionally attached our services and humanitarian work are. Selected branches and the headquarters undertook various activities in line with the theme to commemorate the WRCD.

The ECHO PPP is implemented with the support of the Netherlands Red Cross and the IFRC Harare Cluster Delegation. This has improved coordination of the IFRC network within the country and aligning the projects and emergency operations to find complementarity and avoid duplication. .

### National Society Development

#### IFRC network joint support

The National Society has achieved significant progress towards National Society development by strategically leveraging its strategic plan. This advancement has been facilitated by key enabling factors, including the revision of the Branch Operations Manual and Membership Policy, which guided the restructuring of branches in alignment with a new model focused on financial sustainability. Capacity building initiatives, supported by collaborations with partners like the Netherlands Red Cross and the Help the Helper (HtH) project, have enhanced volunteer skills in vital areas. The National Society's branch capacity assessment and commitment to income-generating activities have contributed to its financial sustainability objectives.

The adoption of a new branch model reorganized branches for efficiency, incorporating income generation. Collaborations with external partners, active engagement in global initiatives, and IFRC Network support have all played vital roles in strengthening the National Society.

The Zambian Red Cross has been actively engaging its youth members in income-generating activities in collaboration with the Italian Red Cross. These initiatives have not only increased membership and the Red Cross's visibility but also enabled young volunteers to acquire valuable skills. Challenges remain, including the need for additional materials for youth programs. The Zambian Red Cross is addressing these concerns by reviewing its youth policy and developing youth by-laws. Overall, these efforts represent Zambian Red Cross' commitment to improving its operations and community engagement. .

## Humanitarian diplomacy

---

The Zambian Red Cross will work closely with the key stakeholders through a multi-sectoral approach both at the national and district levels to advocate, enhance impact, building trust and improve understanding of the National Society role and activities through the currently running projects such as the BHA project, which aims to build trust during the COVID-19 pandemic in humanitarian settings.

## Accountability and agility (cross-cutting)

---

The National Society continued its journey to digital transformation by conducting a digital transformation assessment designed to identify opportunities and priorities for digitally transforming the humanitarian services of National Society. The assessment guided National Societies in developing a roadmap for digital transformation.

**The International Federation of Red Cross and Red Crescent Societies (IFRC)** is the world's largest humanitarian network, with 191 National Red Cross and Red Crescent Societies and around 15 million volunteers. Our volunteers are present in communities before, during and after a crisis or disaster. We work in the most hard to reach and complex settings in the world, saving lives and promoting human dignity. We support communities to become stronger and more resilient places where people can live safe and healthy lives, and have opportunities to thrive.

## DATA SCOPE AND LIMITATIONS

- **Timeframe and alignment:** The reporting timeframe for this overview is covering the period from 1 January to 30 June 2023. However, due to the diversity of the IFRC and differences in fiscal years, this coverage may not fully align for some National Societies. Mid-year reporting data may have been based on estimations, with plans to submit more robust numbers at the annual reporting stage.
- **Missing data and breakdowns:** National Societies have diverse data collection systems and processes that may not align with the standardized indicators. Data may not be available for some indicators, for some National Societies. This may lead to inconsistencies across different reporting tools as well as potential under or over-estimation of the efforts led by all.
- **Reporting bias:** The data informing this Federation-wide overview is self-reported by each National Society (or its designated support entity) and which is the owner and gatekeeper, and responsible for accuracy and updating. IFRC tries to triangulate the data provided by the National Societies with previous data and other data in the public domain.
