Overview

Funding Sources

Appeal number **MAALR002**

In addition to: CHF 396,000 DREF Funding

STRATEGIC PRIORITIES

Climate and environment	Developing and implementing strategies and plans that address rising climate and environmental risks?	Yes
	Implementing environmental or climate campaigns focused on behaviour change, plastic reduction or clean-ups?	Yes
	Implementing nature-based solutions (including those with a particular focus on the planting of trees and mangroves)?	Yes
	People reached with activities to address environmental problems	9,000
	People reached with activities to address rising climate risks	10,000
Disasters and crises	People reached per year with support services, in-kind, cash and voucher assistance for emergency response and recovery	20,000
	People reached with disaster risk reduction	9,000
	People reached with livelihoods support	9,000
	People reached with shelter support	2,000
	Percentage of humanitarian assistance delivered using cash and vouchers	67%
Health and wellbeing	People reached by National Societies with contextually appropriate health services	66,000
	People reached by National Societies with contextually appropriate water, sanitation and hygiene services	3,000
	People reached with immunization services	10,000
	People reached with psychosocial and mental health services	713
	People trained by National Societies in first aid	240
Values, power and inclusion	Is Community Engagement and Accountability integrated and institutionalized in the National Society policies, operations, and procedures (with clear benchmarks)?	Yes
	People reached by protection, gender and inclusion programming	2,000
	People reached by RCRC educational programmes	66,000

ENABLING FUNCTIONS

Strategic and operational coordination	Number of formal interagency/international coordination platforms the IFRC Network is part of	7
	Number of government led coordination platforms the National Society is part of	3
National Society development	National Society covers health, accident and death compensation for all of their volunteers	Yes
	One National Society Development plan in place	Yes
Accountability and agility	National Society has a PSEA Action Plan to enforce prevention and support survivors (cumulative)	Yes
	National Society have strengthened their integrity and reputational risk mechanisms	Yes

Total Funding Reported **CHF 2.8M**

OVERALL PROGRESS

Context

On 22 January 2024, Joseph Nyumah Boakai was sworn in as Liberia's third post-war president following tightly contested elections in late 2023. As the new government appoints officials, controversies have emerged over the removal of some tenure officials accused of violating the Code of Conduct during the elections, a decision criticized by civil society actors.

The elections occurred during the rainy season, which saw isolated flooding across the country. Liberia has also faced a surge in fire disasters, particularly in Monrovia, where 16 incidents resulting in 9 deaths were recorded in one month. Faulty electrical connections were identified as the primary cause, prompting responses from the government and state actors, including the Liberia Electricity Corporation.

The Liberia National Red Cross Society, operating with reduced staff due to funding constraints, is overburdened but employing Humanitarian Diplomacy to strengthen partnerships with the new government and the National Disaster Management Agency. The National Society is also actively implementing key initiatives. These include the [Early Warning for All \(EW4ALL\)](#), a nine-month global project led by the IFRC to enhance flood preparedness and response under the United Nations' ambition to reduce disaster impacts by 2027.

In addition, the National Society is continuing a three-year climate resilience project in three chapters, supported by the Swedish Government and the Swedish Red Cross. A Global Fund Malaria program, managed by Plan International Liberia, is also underway in River Gee and Grand Kru, focusing on distributing insecticide-treated mosquito nets to over 3,000 households. Furthermore, in 2024, the IFRC, through the USAID Bureau of Humanitarian Affairs, will support a 10-month project addressing livelihoods, [food security](#), [disaster risk management](#), and preparedness in three chapters facing significant challenges in these areas.

Key achievements

Climate and environment

In 2023, the Liberia National Red Cross Society made progress with its climate change adaptation and resilience initiatives through the Green, Inclusive and Resilient Liberian Communities (GIRL) project, supporting 12 communities in Sinoe, River Gee, and Grand Kru counties. The Society also conducted a flood Disaster Response Emergency Fund (IFRC-DREF) operation, assisting several families affected by floods in multiple counties. Additionally, the National Society trained community-based action teams in disaster risk reduction, first aid, and climate-smart agriculture, while establishing community action plans. The National Society participated in international meetings and ongoing flood response projects, supported by ECOWAS, assisting further affected families with cash and other relief efforts.

Disasters and crises

The Liberia National Red Cross Society responded to major floods in Bong, Cape Mount, and Montserrado, assisting several families with cash, [shelter](#), [psychosocial support](#), and [WASH](#) services. Volunteers were trained in hand pump repair, water point chlorination, and hygiene promotion, leading clean-up campaigns and improving drainage systems. The National Society also trained volunteers in emergency response and first aid as part of elections preparedness, while supporting pest invasion responses in Bong and River Cess. Additionally, military and paramilitary officers received first aid training, and several families in Montserrado received aid after a fire disaster.

Health and wellbeing

The Liberia National Red Cross Society participated in the Global COVID-19 Lessons Learned Research, training volunteers in digital data collection using the Kobo tool. Through the Green, Inclusive and Resilient Liberian Communities (GIRL) project, the Society helped communities improve resilience to health risks, particularly diarrhea and malaria, by establishing and training several Mothers' Clubs in health adaptation skills. These clubs led community-based health awareness, with support from the Ministry of Health and the Society's Health Promotion Department. Additionally, the Saving Lives and Livelihoods Project trained volunteers in COVID-19 awareness, contributing to the vaccination of thousands people in four counties. Plans for the second phase of the project are underway.

Values, power, and inclusion

The Liberia National Red Cross Society adopted a [Protection, Gender, and Inclusion \(PGI\)](#) Framework, integrating it into its programming as a key safeguarding tool. The PGI components were consistently monitored and provided oversight throughout the reporting period. A Gender Plan of Action was developed for the GIRL Project and is being applied to other initiatives. Efforts ensured equal representation of women and the inclusion of people with disabilities in activities, with coaching provided to project staff to ensure the collection and reporting of Sex and Age Disaggregated Data (SADD).

Enabling local actors

The Liberia National Red Cross Society actively participates in coordination efforts with the IFRC, National Disaster Management Agency (NDMA), Ministry of Health, and other partners. During the IFRC-DREF operation, volunteers adhered to the Code of Conduct, and lessons-learned workshops were held. The National Society plays a key role in disaster risk reduction (DRR) and health coordination, working closely with the Ministry of Health and National Public Health Institute. It is involved in climate adaptation efforts with environmental partners. Additionally, the Red Cross supports government efforts in disease outbreaks, such as the 2022 measles campaign, providing essential social mobilization and community outreach.

IFRC NETWORK ACTION

STRATEGIC PRIORITIES

Climate and environment

Progress by the National Society against objectives

In 2023, the Liberia National Red Cross Society implemented a climate change adaptation and resilience project in three counties in the southeast of Liberia. The Green, Inclusive and Resilient Liberian Communities (GIRL) project is supported by the Government of Sweden (SIDA) through the Swedish Red Cross and is focused on 12 communities in Sinoe, River Gee, and Grand Kru. The project targets rural and semi-urban communities challenged with the adverse effect of climate, health and livelihood risks. The National Society is using solarized system for energy at its HQ and three Chapters in the southeast, this has reduced the National Society's fuel consumption for generators; thus, also reducing the amount spent on the public electricity grid.

In 2023, the Liberia National Red Cross Society undertook extensive activities under the Green, Inclusive, and Resilient Liberian Communities (GIRL) initiative. It implemented an IFRC-DREF flood response, delivering cash, shelter, psychosocial support (PSS), and Water, Sanitation, and Health (WASH) support to families in Grand Cape Mount, Bong, and Montserrado Counties. Additionally, a flood response project supported by ECOWAS and the National Disaster Management Agency provided cash assistance to families in Montserrado and Margibi. The Society conducted [Enhanced Vulnerability and Capacity Assessments \(EVCA\)](#) in communities, trained trainers, and established Community-Based Action Teams (CBATs) that developed and implemented Community Action Plans. CBAT training included disaster risk reduction, first aid, climate-smart agriculture, community health, and initiatives such as [Neat+](#) and [Green Response](#). The National Society participated in global COVID-19 research, engaged in climate programming in collaboration with the Swedish Embassy, and formed a Green Response Working Group. It also took part in two international meetings on [Cash and Voucher Assistance \(CVA\)](#) and facilitated a panel on urban displacement at the Urban Collaboration Platform Conference.

IFRC network joint support

The Liberia National Red Cross Society has been supported by the IFRC and Swedish Red Cross in 2023.

For real-time information on emergencies, see [IFRC GO page Liberia](#)

NAME OF OPERATION	Liberia Floods
MDR-CODE	MDRLR007
DURATION	4 months (13 September 2023 to 31 January 2024)
FUNDING ALLOCATION	CHF 395,575
PEOPLE TARGETED	8,751
DREF OPERATION DOCUMENT	DREF Operations update

In 2023, the IFRC Disaster Response Emergency Fund ([IFRC-DREF](#)) was approved for Flood in Liberia

The [IFRC-DREF](#) allocation of CHF 395, 575 in September 2023 supported the Liberia National Red Cross Society in assisting approximately 8, 751 people affected by the floods in the North-Eastern counties of Liberia: Grand Cape Mount, Bong and Montserrado. The National Society supported the targeted people over a four-month period with assistance including [Shelter](#), Housing And Settlements, [Water, Sanitation And Hygiene](#), [Protection, Gender And Inclusion](#) among others.

Progress by the National Society against objectives

Liberia National Red Cross Society implemented a major flood response using IFRC-DREF in 2023/2024; 1,250 affected families from Bong, Cape Mount, and Montserrado were assisted with cash, [shelter](#), PSS, and WASH support.

Under the IFRC-DREF operation, the Liberia National Red Cross Society trained volunteers in hand pump repair, water point chlorination, and WASH awareness, deploying them to lead health, hygiene, and environmental campaigns in affected communities. Their efforts, supported by community committees, included widespread awareness sessions focused on promoting good hygiene practices and the importance of maintaining a clean and safe environment. These initiatives inspired significant community-led clean-up campaigns, supported by the provision of sanitation materials such as wheelbarrows, rakes, gloves, and shovels, which improved waterways, drainage systems, and major gutters that contributed to flooding during the rainy seasons. The operation also facilitated the repair of water points and chlorination of handpumps and unprotected wells, enhancing access to clean water and improving overall community health and safety.

As part of Liberia National Red Cross Society elections and organizational [preparedness for effective response \(PER\)](#), 38 volunteers (13 females, 25 males) completed Emergency Response Team (ERT) training. The volunteers were trained in emergency [first aid](#) response, and the [Safer Access Framework \(SAF\)](#). The training prepared the volunteers for the elections and also enhanced their knowledge of their roles during disasters and emergencies.

Out of five counties affected by the pest invasion, Liberia National Red Cross Society volunteers supported two counties (Bong, and River Cess) response mechanisms. 10 volunteers (3 females, 7 males) in Bong participated in community engagement and spraying in affected communities; Liberia National Red Cross Society provided assorted Personal Protective Equipment (PPE) to the County Agriculture teams to be used for the response operation; in River Cess, the Chapter participated in a joint assessment of affected communities. Three (1 female, and 2 males) including the Field Officer, were part of the exercise.

151 military (security) and paramilitary officers (55 females, 96 males) received basic [first aid](#), and emergency life-saving first aid training as part of elections preparedness. They also received first aid kits after the training.

In Montserrado, 35 families who had been victims of a fire disaster, received food, non-food items, and construction materials to support them in rebuilding their homes.

A flood response project supported by ECOWAS through the National Disaster Management Agency (NDMA) was implemented by the Liberia National Red Cross Society in 2023 and this project is still ongoing in 2024. A total of 1,841 families were assisted with cash. The beneficiaries were families affected by floods in Montserrado (Monrovia) and Margibi in 2022.

IFRC network joint support

The Liberia National Red Cross Society, through the **Swedish Red Cross'** Initial Response Fund, distributed cash (through mobile money transfer) directly to survivors and victims' families of the fuel tanker explosion in Totota, Bong County, Central Liberia.

The IFRC provided the Somali Red Crescent Society with technical and financial assistance for its activities.

Liberian Red Cross conducted a training on Community Early Warning Systems, training participants from Flewroken, Sarbo Geeken, Matuaken, and Podroken (Photo: IFRC)

Health and wellbeing

Progress by the National Society against objectives

Liberia National Red Cross Society participated in the Global COVID-19 Lessons Learnt Research conducted by the IFRC through the Argentina Red Cross Humanitarian Observatory. 22 volunteers (6 female, 16 male) from Lofa, Nimba, Bong, Margibi, Bassa, Bomi, Cape Mount, and Montserrado received online training for one day in using the Kobo digital data collection tool.

Through the GIRL project, communities became more aware and resilient towards health risks and able to adopt a sustained behavior change. This project focused on diarrhea diseases and malaria which are the major health challenges of the targeted communities.

To achieve the above in a sustainable manner, 12 Mothers' Clubs (MCs) comprising of 120 members were established and trained in community-based health adaptation skills in all 12 communities. The Health Promotion Department of the Ministry of Health (MoH) at the county level, with support from the Health Department of the Liberian National Red Cross Society, facilitated training for the MCs. The Liberia National Red Cross Society, with support from the Ministry of Health developed a simplified IE&C material in English with visuals which are being used by the MC for community education and awareness on diarrhea, malaria and appropriate breastfeeding.

Armed with the improved skills and knowledge, the MCs began to take lead on community-based health awareness in their communities. The MCs worked with the Community Health Assistants (government structures available in some communities) to conduct health awareness and provide technical support.

As a malaria prevention measure, Mother's Clubs will be provided with mosquito nets to be distributed. About 1000 mosquito nets have already been procured and will be distributed in the first quarter of 2024.

The Saving Lives and Livelihoods Project, launched in early 2023, trained volunteers in COVID-19 awareness and vaccination promotion, leading to the vaccination of 60,000 people across four counties through a collaborative campaign with the Ministry of Health and the Christian Health Association of Liberia. A planning exercise in June revised the project's Micro Plan, budget, and operational strategy to integrate COVID-19 vaccines into national routine immunization efforts, although the second phase of the project has yet to commence.

IFRC network joint support

The IFRC provided the Somali Red Crescent Society with technical and financial assistance for its activities.

Migration and displacement

Progress by the National Society against objectives

The Liberia National Red Cross Society has adopted a Protection, Gender, Inclusion (PGI) Framework and mainstreamed it into its programming quality as a major safeguarding tool. The continuous use of the PGI lens in project implementation remained critical throughout the reporting period. During the reporting period, the monitoring of the PGI components and the provision of PGI oversight remained on track. Liberia National Red Cross Society also developed a Gender Plan of Action for the GIRL Project and this plan is also being referenced across other projects/programs of the National Society.

It is clear from the total number of people reached with activities during the period reporting, that women, have been represented equally with their male counterparts. Due to the awareness amongst Liberia National Red Cross Society field staff, people living with disabilities were consistently included in activities as well. Coaching continued for project staff to ensure Sex and Age Disaggregated Data (SADD) in their reporting.

IFRC network joint support

With the support of the IFRC's Capacity-Building Fund, the Liberia National Red Cross Society has developed Safeguarding Policies on Children, Prevention of Sexual Exploitation and Abuse (PSEA), and Sexual Harassment.

ENABLING LOCAL ACTORS

Strategic and operational coordination

IFRC membership coordination

IFRC membership coordination involves working with member National Societies to assess the humanitarian context, humanitarian situations and needs; agreeing on common priorities; jointly developing common strategies to address issues such as obtaining greater humanitarian access, acceptance and space; mobilizing funding and other resources; clarifying consistent public messaging; and monitoring progress. This also means ensuring that strategies and programmes in support of people in need, incorporate clarity of humanitarian action, links with development assistance, and efforts to reinforce National Societies in their respective countries, including through their auxiliary role.

During the IFRC-DREF operation, volunteers followed the Liberia National Red Cross Society's Code of Conduct, with oversight from headquarters teams. A lessons-learned workshop assessed the impact, and the National Disaster Management Agency (NDMA) activated its coordination mechanism, involving key actors like the Red Cross. The Society is involved in national disaster risk reduction (DRR) and health coordination, playing a technical role in the national DRR platform and collaborating with the Ministry of Health and the National Public Health Institute. It also participates in climate adaptation and mitigation efforts with the Environmental Protection Agency and other climate partners.

Movement coordination

The coordination and cooperation mechanisms in Liberia are established through a Movement Cooperation Agreement, which includes the National society, IFRC, and International Committee of Red Cross (ICRC) leadership. The Movement platform meeting focuses on strategic-level engagement, while the Movement operational coordination meeting brings together the National society, IFRC, ICRC, and Partner National Societies working in Liberia. Technical working groups concentrate on specific technical areas of common interest and involve specialists from each organization. These efforts align with the [Strengthening Movement Coordination and Cooperation \(SMCC\)](#) principles and the newly adopted [Seville Agreement 2.0](#).

In Liberia, **the ICRC** promotes detainee welfare, provides water and sanitation, supports the Liberian National Red Cross Society, and promotes international humanitarian law. In addition, it supports Ivorians who have fled violence in their own country and the Liberians who are hosting them.

External coordination

The Liberian Red Cross Society works in close collaboration and coordination with the National Disaster Management Agency, to ensure its relevance as a key national preparedness and response actor. At county and district level, the National Society is represented strongly in the disaster management structures through its chapters and branches. All preparedness and response actions conducted by the National Society focus on supporting the Government's strategies and actions on disaster and crisis preparedness and response.

The Liberian Red Cross Society works closely with the Ministry of Health to address disease outbreaks, including the 2022 measles outbreak. The National Public Health Institute of Liberia has been coordinating technical aspects of the response, whereas the Ministry of Health oversees the coordination, monitoring, detection, and referral of cases to health facilities, and conducts testing in various laboratories within the country. Other actors involved in the measles response include the World Health Organization (WHO), UNICEF, and the United States Centre for Disease Control and Prevention, all of which support the Government's efforts. Médecins Sans Frontières, Plan International, and Breakthrough Action have also contributed to the response.

The National Society aligned its measles campaign and outreach activities with the Government's strategy and scheduled countywide campaign. The Liberian Red Cross Society was the Ministry of Health's only partner to carry out social mobilization and community-level outreach and awareness during the measles vaccination campaign, to support routine uptake.

National Society Development

Progress by the National Society against objectives

The Liberia National Red Cross Society made significant progress against its objectives during the reporting period, particularly in strengthening its Workplace First Aid business. Supported by the Netherlands and Swedish Red Cross, the business aimed for sustainable income generation but faced challenges due to the country's economic conditions and disruptions from the presidential and general elections. Despite these setbacks, the business achieved over half of its annual target and participated in the Regional Conference on First Aid in Senegal, focusing on developing commercial first aid activities under the First Aid Vision 2030 framework. Youth and volunteer management remained a priority, with activities including school club engagements, capacity-building sessions, and the celebration of key events such as World Environment Day, which mobilized youth and volunteers for plastic waste collection and awareness campaigns across multiple counties. International days such as World Youth Day, World Humanitarian Day, and International Volunteer Day were marked with community service activities, sporting events, and recognition of volunteers' contributions.

The volunteer database was consistently updated, recording over 3,600 active volunteers. Training sessions, including first aid dissemination and simulation exercises, enhanced volunteer skills, while the adoption of a youth policy and the development of a national youth strategy for 2024-2027 further strengthened [youth engagement](#). Efforts under [Protection, Gender, and Inclusion \(PGI\)](#) and [Community Engagement and Accountability \(CEA\)](#) focused on addressing issues such as sexual and gender-based violence, stigma, and exclusion, ensuring the dignity, safety, and participation of all. Collaboration with the Ministry of Gender, Children, and Social Protection and other partners facilitated initiatives such as the National Children's Parliament Election, the Day of the African Child celebration, and advocacy for the inclusion of people living with disabilities in decision-making processes. The PGI team also coordinated with county gender coordinators to address domestic and gender-based violence cases, ensuring swift referral and resolution. Through these comprehensive efforts, the Liberia National Red Cross Society continued to champion the causes of vulnerable communities while strengthening its internal systems and community impact.

The Liberia National Red Cross Society further advanced its National Society Development efforts through the Sustainable National Societies and Resilient Communities Programme. Key achievements included renovating and reopening the KOPAA Guesthouse for income generation, providing seed grants to 13 chapters for resource mobilization, and securing partnerships for WASH activities and other initiatives. Institutional capacity improved with a strategic planning workshop and financial systems training using QuickBooks. Partnerships with organizations like SnooCODE optimized logistics and enhanced operations. These actions strengthened sustainability and the society's ability to deliver effective humanitarian services.

IFRC network joint support

The Swedish and Netherlands Red Cross provided crucial support to the Liberia National Red Cross Society, with the Swedish Red Cross contributing to National Society Development activities, including income generation, capacity building, and sustainability initiatives under the Sustainable National Societies and Resilient Communities Programme. The Netherlands Red Cross supported the Workplace First Aid business, helping it achieve over half of its annual target despite economic and election-related challenges.

Humanitarian diplomacy

Progress by the National Society against objectives

Advocacy and diplomacy are integrated into Liberia National Red Cross Society humanitarian operations. During the period, the Liberia National Red Cross Society Secretary General, travelled to various counties to meet local authorities and explore partnership opportunities. One of the outcomes in the meeting with local authorities at the county level was the allocation of UDS 10,000 to the Bomi Chapter from County social development fund provided by the Government. The Secretary General brought together business communities into the partnership meetings and over time, these steps towards connecting the National Society with national partners will bring dividends.

A milestone achievement toward the Liberia National Red Cross Society diplomacy in 2023 is placement of the National Society back in the national budget. In 2017, the Liberia National Red Cross Society had been taken out of the national budget but in 2023 it was reinstated. Liberia National Red Cross Society brought together its governance board members and trained them in humanitarian diplomacy.

IFRC network joint support

The IFRC provided the Somali Red Crescent Society with technical and financial assistance for its activities.

Accountability and agility (cross-cutting)

Progress by the National Society against objectives

Liberia National Red Cross Society has developed and adopted an institutional Risk Management Framework; the IFRC supported the process by facilitating a mission to further strengthen the Liberia National Red Cross Society risk awareness and its policy base.

Liberia National Red Cross Society has in place, a financial reporting mechanism according to its procedures in finance and logistics.

There are Safeguarding policies in place, such as Code of Conduct, Child Safeguarding Policy, PSEA Policy, Whistle-Blower Protection Policy, and Anti-Harassment Policy.

An Anti-Fraud and Corruption Policy is also in place and staff are required to sign-up whenever they are hired; staff induction/orientation takes into account a drill through the various policies and safeguarding documents of the Liberia National Red Cross Society.

The Liberia National Red Cross Society utilizes a user-friendly website, social media, and the KOBO Collect mobile app for community engagement, data collection, and needs assessment. Plans include expanding online training for disaster response and community health. Partnerships like SnooCODE bring innovation, while QuickBooks enhances financial management, with discussions underway to integrate asset registry and procurement features. The organization emphasizes diversity, inclusion, and cultural sensitivity among staff and volunteers.

IFRC network joint support

The IFRC provided the Somali Red Crescent Society with technical and financial assistance for its activities.

The International Federation of Red Cross and Red Crescent Societies (IFRC) is the world's largest humanitarian network, with 191 National Red Cross and Red Crescent Societies and around 15 million volunteers. Our volunteers are present in communities before, during and after a crisis or disaster. We work in the most hard to reach and complex settings in the world, saving lives and promoting human dignity. We support communities to become stronger and more resilient places where people can live safe and healthy lives, and have opportunities to thrive.

DATA SCOPE AND LIMITATIONS

- **Missing data and breakdowns:** National Societies have diverse data collection systems and processes that may not align with the standardized indicators. Data may not be available for some indicators, for some National Societies. This may lead to inconsistencies across different reporting tools as well as potential under or over-estimation of the efforts led by all.
- **Reporting bias:** The data informing this Federation-wide overview is self-reported by each National Society (or its designated support entity) and which is the owner and gatekeeper, and responsible for accuracy and updating. IFRC tries to triangulate the data provided by the National Societies with previous data and other data in the public domain.
