NATIONAL SOCIETY PROFILE

As per 2024 Plan. To be updated in full 2025 Plan, as per need

The **Uruguayan Red Cross** was admitted to the International Federation of Red Cross and Red Crescent Societies (IFRC) in 1920. The Uruguayan Red Cross is a civil association established under the laws of the Eastern Republic of Uruguay on 5 March 1897, with its legal status granted by the Executive Branch on 26 October 1897.

Through its territorial network of departmental and local branches, the National Society is able to provide a timely and efficient response wherever needed. Volunteers are often the first to arrive at a disaster scene and remain during the community rebuilding stages.

The National Society's mission is to fulfil its humanitarian mandate to assist people and their communities in vulnerable situations as well as to protect and promote health so that

people can achieve a life of dignity. All this is achieved within the Fundamental Principles and humanitarian values framework.

The Uruguayan Red Cross embraces different responsibilities, notably risk management and disaster response, communications, resource mobilization and development, and volunteering. It also hosts a comprehensive training centre that provides training services in areas such as first aid, water rescue, and nursing.

In its Strategic Plan (2022-2026), the Uruguayan Red Cross is committed to promoting community resilience, strengthen the competencies of communities for the positive transformation, and generating institutional strategies aimed at internal strengthening for the response assertiveness in humanitarian assistance contexts.

National Society branches of the Uruguayan Red Cross Society

The map does not imply the expression of any opinion on the part of the IFRC or the National Society concerning the legal status of a territory or its authorities

The International Federation of Red Cross and Red Crescent Societies (IFRC) is the world's largest humanitarian network, with 191 National Red Cross and Red Crescent Societies and around 16 million volunteers. Our volunteers are present in communities before, during and after a crisis or disaster. We work in the most hard to reach and complex settings in the world, saving lives and promoting human dignity. We support communities to become stronger and more resilient places where people can live safe and healthy lives, and have opportunities to thrive.

About the plan

This extract will be replaced by the full plan soon.

The plan reflects the priorities of the host National Society, the IFRC and National Societies providing international support, for 2025 and subsequent years. It is aligned with IFRC [Strategy 2030](#), representing the collective ambitions of the IFRC membership, and is the result of a joint planning process and will serve for joint monitoring and reporting. It will be revised on an annual basis to adjust priorities and funding requirements to the needs in-country.

Explanatory note on funding requirements

- The total funding requirements show what the IFRC network seeks to raise for the given year through different channels: funding through the IFRC, through participating National Societies as bilateral support, and through the host National Society from non-IFRC network sources. All figures should include the administrative and operational costs of the different entities
- Host National Society funding requirements not coming from IFRC network sources can comprise a variety of sources, as demonstrated when reporting on income in the [IFRC Federation-wide Databank and Reporting System](#)
- Participating National Society funding requirements for bilateral support are those validated by respective headquarters, and often represent mainly secured funding
- IFRC funding requirements comprise both what is sourced from the IFRC core budget and what is sought through emergency and thematic funding. This includes participating National Societies' multilateral support through IFRC, and all other IFRC sources of funding
- Figures for the years beyond 2025 most often represent partial requirements that are known at time of publication. Many National Societies have annual internal approval processes for funding requirements, and lower figures do not mean a decrease in funding requirements in future years
- Missing data and breakdowns: data may not be available from all IFRC network members for funding requirements. This may lead to inconsistencies across different reporting tools as well as potential under-estimation of the efforts led by all
- Reporting bias: the data informing this Federation-wide overview is self-reported by each National Society (or its designated support entity) which is the owner and gatekeeper, and responsible for accuracy and updating. IFRC tries to triangulate the data provided by the National Societies with previous data and other data in the public domain
