NATIONAL SOCIETY PROFILE

As per 2024 Plan. To be updated in full 2025 Plan, as per need

The **Moroccan Red Crescent** was established in 1957 by a royal a decree and was [admitted](#) into the International Federation of the Red Cross and Red Crescent Societies (IFRC) in 1958. The Dahir (royal decree) recognized the Moroccan Red Crescent as an autonomous voluntary aid society, auxiliary to the public authorities in civil and military health and was also recognized as the only National Society mandated to carry out all humanitarian actions throughout the Moroccan territory.

As an auxiliary to the public authorities in the humanitarian field, the National Society supports state actors while maintaining neutrality and independence, adhering to the principles and values of the International Red Cross and Red Crescent Movement. The Moroccan Red Crescent provides assistance to vulnerable populations affected by disasters and supports people in exceptional situations through emergency response and relief assistance. It conducts capacity-building programmes, first aid training, disaster preparedness, risk

reduction, and community-based awareness campaigns. The Moroccan Red Crescent is structured through central organs consisting of a General Assembly, Central Committee, Board of Directors, and a General Secretariat.

The National Society has mobilized resources to assist affected communities by providing emergency aid, medical support, and long-term recovery initiatives. Through its ongoing efforts, the Moroccan Red Crescent continues to play a vital role in enhancing the resilience of vulnerable populations and addressing the pressing humanitarian needs arising from both natural disasters and public health crises, as per the priority pillars set out in the [Strategic Plan 2021-2025](#).

In [2022](#), the Moroccan Red Crescent reached more than 20,000 people through its disaster response and early recovery programmes.

The International Federation of Red Cross and Red Crescent Societies (IFRC) is the world's largest humanitarian network, with 191 National Red Cross and Red Crescent Societies and around 16 million volunteers. Our volunteers are present in communities before, during and after a crisis or disaster. We work in the most hard to reach and complex settings in the world, saving lives and promoting human dignity. We support communities to become stronger and more resilient places where people can live safe and healthy lives, and have opportunities to thrive.

About the plan

This extract will be replaced by the full plan soon.

The plan reflects the priorities of the host National Society, the IFRC and National Societies providing international support, for 2025 and subsequent years. It is aligned with IFRC [Strategy 2030](#), representing the collective ambitions of the IFRC membership, and is the result of a joint planning process and will serve for joint monitoring and reporting. It will be revised on an annual basis to adjust priorities and funding requirements to the needs in-country.

Explanatory note on funding requirements and definitions

- The total funding requirements show what the IFRC network seeks to raise for the given year through different channels: funding through the IFRC, through participating National Societies as bilateral support, and through the host National Society from non-IFRC network sources. All figures should include the administrative and operational costs of the different entities
- Host National Society funding requirements not coming from IFRC network sources can comprise a variety of sources, as demonstrated when reporting on income in the [IFRC Federation-wide Databank and Reporting System](#)
- Participating National Society funding requirements for bilateral support are those validated by respective headquarters, and often represent mainly secured funding
- IFRC funding requirements comprise both what is sourced from the IFRC core budget and what is sought through emergency and thematic funding. This includes participating National Societies' multilateral support through IFRC, and all other IFRC sources of funding
- Figures for the years beyond 2025 most often represent partial requirements that are known at time of publication. Many National Societies have annual internal approval processes for funding requirements, and lower figures do not mean a decrease in funding requirements in future years
- Missing data and breakdowns: data may not be available from all IFRC network members for funding requirements. This may lead to inconsistencies across different reporting tools as well as potential under-estimation of the efforts led by all
- Reporting bias: the data informing this Federation-wide overview is self-reported by each National Society (or its designated support entity) which is the owner and gatekeeper, and responsible for accuracy and updating. IFRC tries to triangulate the data provided by the National Societies with previous data and other data in the public domain
- **Definitions:**
 - » **Local units:** ALL subdivisions of a National Society that coordinate and deliver services to people. These include ALL levels (provincial, state, city, district branches, sections or chapters, headquarters, and regional and intermediate offices, as well as community-based units)
 - » **Branches:** A Branch has its roles, responsibilities and relationship with the National Headquarters defined through the National Society's Statutes, including the level of autonomy given, especially in the area of its legal status, mobilising local resources and building local partnerships, and the decisions it makes. It has a local-level decision-making mechanism through its Branch members, board and volunteers, equally defined through the National Society's Statutes
