NATIONAL SOCIETY PROFILE

As per 2024 Plan. To be updated in full 2025 Plan, as per need

The **Jordan National Red Crescent Society** was established in 1947 and was admitted to the International Red Cross and Red Crescent Movement (IFRC) in 1950. As an independent organisation, the National Society has its own legislation, and its statutes were approved by the General Assembly in 1970.

The National Society is among the leading national organizations working with volunteers in the country and it plays an auxiliary role to the Government in the context of humanitarian assistance. The mandate of the Jordan National Red Crescent Society is to alleviate the suffering of vulnerable groups, people affected by armed conflict and natural disasters, and to protect their dignity and rights in a manner that preserves their lives, safety, security, and wellbeing.

The Jordan National Red Crescent Society has a network of 10 branches located in 10 governorates which provides support through the implementation of programs related to relief,

health, social services, and youth empowerment to the people in Jordan. The National Society volunteers are composed of a trained team on community-based health and first aid approach (CBHFA), Red Crescent Action Teams (RCAT), and relief volunteers trained on distribution of relief items.

The Jordan National Red Crescent Society owns and manages a 126-bed hospital in Amman which includes five operation rooms, one intensive care unit, a kidney dialysis unit, an emergency department, an imaging unit, a laboratory, one pharmacy, and one blood bank. The National Society also manages an outpatient clinic for Syrian refugees as well as a mobile clinic for outreach health programmes.

In 2023, the Jordan National Red Crescent Society reached more than 82,000 people through its disaster response and early recovery programmes.

Map of Jordan National Red Crescent Society branches

The map does not imply the expression of any opinion on the part of the IFRC or the National Society concerning the legal status of a territory or its authorities

The International Federation of Red Cross and Red Crescent Societies (IFRC)

is the world's largest humanitarian network, with 191 National Red Cross and Red Crescent Societies and around 16 million volunteers. Our volunteers are present in communities before, during and after a crisis or disaster. We work in the most hard to reach and complex settings in the world, saving lives and promoting human dignity. We support communities to become stronger and more resilient places where people can live safe and healthy lives, and have opportunities to thrive.

About the plan

The plan reflects the priorities of the host National Society, the IFRC and National Societies providing international support, for 2025 and subsequent years. It is aligned with [IFRC Strategy 2030](#), representing the collective ambitions of the IFRC membership, and is the result of a joint planning process and will serve for joint monitoring and reporting. It will be revised on an annual basis to adjust priorities and funding requirements to the needs in-country.

Explanatory note on funding requirements and definitions

- The total funding requirements show what the IFRC network seeks to raise for the given year through different channels: funding through the IFRC, through participating National Societies as bilateral support, and through the host National Society from non-IFRC network sources. All figures should include the administrative and operational costs of the different entities
- Host National Society funding requirements not coming from IFRC network sources can comprise a variety of sources, as demonstrated when reporting on income in the [IFRC Federation-wide Databank and Reporting System](#)
- Participating National Society funding requirements for bilateral support are those validated by respective headquarters, and often represent mainly secured funding
- IFRC funding requirements comprise both what is sourced from the IFRC core budget and what is sought through emergency and thematic funding. This includes participating National Societies' multilateral support through IFRC, and all other IFRC sources of funding
- Figures for the years beyond 2025 most often represent partial requirements that are known at time of publication. Many National Societies have annual internal approval processes for funding requirements, and lower figures do not mean a decrease in funding requirements in future years
- Missing data and breakdowns: data may not be available from all IFRC network members for funding requirements. This may lead to inconsistencies across different reporting tools as well as potential under-estimation of the efforts led by all
- Reporting bias: the data informing this Federation-wide overview is self-reported by each National Society (or its designated support entity) which is the owner and gatekeeper, and responsible for accuracy and updating. IFRC tries to triangulate the data provided by the National Societies with previous data and other data in the public domain
- **Definitions:**
 - » **Local units:** ALL subdivisions of a National Society that coordinate and deliver services to people. These include ALL levels (provincial, state, city, district branches, sections or chapters, headquarters, and regional and intermediate offices, as well as community-based units)
 - » **Branches:** A Branch has its roles, responsibilities and relationship with the National Headquarters defined through the National Society's Statutes, including the level of autonomy given, especially in the area of its legal status, mobilising local resources and building local partnerships, and the decisions it makes. It has a local-level decision-making mechanism through its Branch members, board and volunteers, equally defined through the National Society's Statutes
