Fédération internationale des Sociétés de la Croix-Rouge et du Croissant-Rouge  
Federación Internacional de Sociedades de la Cruz Roja y de la Media Luna Roja  
الاتحاد الدولي لجمعيات الصليب الأحمر والهلال الأحمر

## PAKISTAN: CYCLONE YEMYIN/FLOODS

Appeal No. MDRPK001  
[GLIDE no. FF-2007-000082-PAK](#)  
and [TC-2007-000084-PAK](#)  
24 July 2007

*The Federation's mission is to improve the lives of vulnerable people by mobilizing the power of humanity. It is the world's largest humanitarian organization and its millions of volunteers are active in 186 countries.*

### In Brief

**Operations update no. 05; Period covered: 19 to 22 July 2007; Appeal target: CHF 21.34 million (USD 17.3 million or EUR 12.9 million); Appeal coverage: 29%; Outstanding needs: CHF 15.15 million (USD 12.3 million or EUR 9.1 million)**

*<click here to go directly to the attached donor response report, also [available on the website](#)>*

#### Appeal history:

- [Preliminary Appeal](#) launched on **4 July 2007** for **CHF 10.38 million** (USD 8.5 million or EUR 6.2 million) to assist 14,000 families for **six** months.
- A [Revised Emergency Appeal](#) was launched on **17 July 2007** for **CHF 21.34 million** (USD 17.3 million or EUR 12.9 million) to assist 51,500 families for six months.
- Disaster Relief Emergency Funds (DREF) allocated: **CHF 250,000** on **2 July 2007**.

**Operational Summary:** The Pakistan Red Crescent Society (PRCS) continues to provide health and relief interventions in the flood-affected areas of Balochistan and Sindh Provinces. To date the PRCS has provided health assistance to more than 12,000 people. Non-food items have been distributed to more than 2,400 families (16,800 people). The PRCS water and sanitation (WatSan) team is active in Turbat, Kech District.

Four Emergency Response Units (ERUs) have arrived in the country and are in the process of being deployed to the field. The PRCS and the Federation are working hand-in-hand to provide relief to the affected people. In addition to the assessments earlier conducted in Kech, Jhal Magsi and Shahdad Kot districts, the Federation's Field Assessment and Coordination Team (FACT) has now completed its rapid assessment in Dadu District (Sindh). With new needs identified in Dadu, the plan of action has been adjusted to include health and relief activities in this district. A total of 4,000 families will be targeted in Dadu with activities being implemented by the PRCS and supported by the Federation's field operations office in Larkana.

Livelihood/recovery assessments by the FACT are ongoing in Kech District. However, many people in the affected villages are reluctant to discuss livelihood interventions and are more interested in shelter and relocation. They prefer to be relocated to a new area, and are awaiting the government's decision on the site and land availability. A reassessment of the possibility of livelihood interventions is expected in the future, but only after there has been a decision on the relocation.

### Background

Severe flooding resulting from heavy rains that were exacerbated by a cyclone in late June 2007 has affected over two and a half million people in Pakistan. The Balochistan Province is the most affected, with 23 of its 29 districts impacted. The National Disaster Management Authority (NDMA) has placed the figure of affected people in that province alone at two million, with 176 deaths. The Sindh Province, where at least 500,000 people have been

## **Pakistan: Cyclone Yemyin/Floods; Appeal No. MDRPK001 (Revised); Operations Update No. 5**

affected and 120 deaths confirmed, has also been hard hit. Five of its districts have been affected. Infrastructure has been severely undermined with roads and bridges damaged or destroyed and telecommunications out in many areas since 26 June 2007.

In addition to the considerable loss of life, thousands of people were displaced as their homes were either inundated or washed away by floodwaters. The government has established 149 spontaneous shelter camps for the displaced population in Balochistan and Sindh provinces. In Balochistan, 5,000 villages have been affected while in Sindh, 173 villages are submerged. Over 67,500 houses have reportedly been damaged across the flood affected provinces of Balochistan and Sindh.

### **Operational development**

The full impact of the damage caused by cyclone Yemyin and the floods is becoming clearer as various local and international non-governmental organizations (NGOs) complete their rapid assessments. The situation is likely to deteriorate in some areas. Latest reports show that heavy rains continue in Jhal Magsi and are likely to hinder accessibility to the area. The rest of the country also continues to receive heavy rains. In the North West Frontier Province (NWFP), more than 55 people were killed by lightning and flash floods on 20 July.

Local governments, the military and NGOs are distributing food and non-food relief items to the affected people. Although a large number of tents have been distributed, shelter needs have not been sufficiently met. The report of the joint assessment initiated by NDMA has been completed and shared with all agencies during various cluster and coordination meetings.

The Federation's FACT have conducted rapid assessments in Koshkalat, Gokdan, Nasirabad and Nodez union councils of Kech District (Balochistan Province), Qubo Saeed Khan, Warah, Kambar and Shahdah Kot tehsils of Kambar-Shahdad Kot District (Sindh Province) and Kot Mugsli Union Council in Jhal Magsi District (Balochistan Province). A further assessment was conducted in Mehar, Khairpur Nathan Shah and Johi tehsils of Dadu District (Sindh Province). Based on new needs established in Dadu, the plan of action has been revised to include health and relief activities in this district. A total of 4,000 families will be targeted in Dadu with activities being implemented by the PRCS and supported by the Federation's field operations office in Larkana.

In the revised appeal, five Emergency Response Units (ERUs) are to be deployed in Sindh for three months. Out of these, four have already arrived in the country. The logistics ERU (Swiss Red Cross and Danish Red Cross) has reached Karachi and one of the members is being sent to Larkana. The basic health care ERU (Finnish Red Cross) has reached Larkana along with its equipment while the WatSan ERU (Spanish Red Cross) and Mass Sanitation ERU (British Red Cross) are in Shahdad Kot. The fifth ERU is expected to arrive in the country in the coming days.

The Red Cross Red Crescent flood operation will be coordinated from Karachi where a base office has been set up. Sub-offices are planned in Turbat (Balochistan), Jhal Magsi (Balochistan) and Larkana (Sindh) for ease of implementation. The structures will be supported by a head of operations and four Federation delegates with expertise in: health; WatSan; finance and administration; and recovery/shelter/livelihood.

### **Red Cross and Red Crescent action - objectives, progress, impact**

**Goal: To provide humanitarian assistance to flood-affected families in Balochistan and Sindh Provinces and support their early self recovery to contribute to the restoration of their basic living conditions.**

PRCS/Federation WatSan team inspects an 80 feet long water pipeline rehabilitated in village of Nokalat, Kech District, Baluchistan. Federation.

**Objective 1 (Health): The health status of 152,500 flood affected people in Balochistan and Sindh Provinces is improved through provision of basic preventive health and curative care for six months.**

**Achievements:**

The PRCS has four mobile health teams positioned in Sindh and Balochistan. The National Society previously had sent out more health teams in other areas. Various PRCS health teams and basic health units have treated up to 12,081 patients in Balochistan and Sindh. The main prevailing diseases in the flood-affected areas are acute respiratory infections, diarrhea and skin diseases.

A female doctor and a health visitor with the PRCS/Federation health team examine a female patient at Tanzag village in Kech District, Balochistan, and establish a relationship of trust with the community. Federation.

Under the revised appeal, a total of five PRCS/Federation health teams (three in Turbat and two in Jhal Magsi) comprising national staff will be deployed in Balochistan, while a Finnish Red Cross health ERU has been placed in Larkana, Sindh. The ERU arrived in Shahdad Kot on 20 July, where the members were briefed by Federation senior health manager. The manager arranged for the ERU team to meet with NGOs/INGOs working in the area as well as local government officials. Four PRCS health personnel from Khairpur have been mobilized with the ERU for better coordination with the community and for national society capacity building.

Since 3 July 2007, the PRCS Balochistan branch health team in Turbat has so far treated a total of 3,070 patients. The PRCS Sindh branch team in Dadu district has seen 536 patients since 12 July, while the health team in Kambar has treated 2,793 patients since 2 July.

The PRCS basic health unit (BHU) in Thatta District has treated a total of 1,956 patients since 26 June. The PRCS Sindh branch had earlier deployed three medical teams inside Karachi (between 26 June and 2 July). These teams saw a total of 1,260 patients. The PRCS Punjab provincial branch also sent three medical teams to the coastal areas of Pasni and Ormara in Balochistan between 5 to 2 July. The teams treated 2,175 patients.

The number of people treated between 18 and 22 July are as follows:

Patients	Turbat	Larkana	Dadu	Total	Percentage (%)
Male	177	204	221	602	38
Female	313	92	137	542	35
Children	285	42	93	420	27
Total	775	338	451	1,564	100
<b>Cumulative Total (since 26 June 2007)<sup>1</sup></b>					<b>12,081</b>

**Objective 2 (Water and sanitation): The risk of waterborne and water-related diseases has been reduced through provision of a sustainable access to safe water, adequate sanitation as well as hygiene promotion and education to 17,500 families in Balochistan and Sindh Provinces for six months.**

**Achievements:**

The Spanish Red Cross WatSan ERU and the British Red Cross Mass Sanitation ERU arrived in Shahdad Kot on 20 July. While areas in Sindh will be covered by the ERUs, selected areas in Balochistan Province will be covered by PRCS, supported by Federation local staff.

The PRCS WatSan team has distributed 15,580 chlorine sachets (five grams each) to 1,095 families in adjoining areas of Turbat since 12 July 2007. An assessment for further needs for chlorine sachets is being carried out in two villages in the Koshkalat union council. The WatSan team has also completed the rehabilitation of a water pipeline

<sup>1</sup> The cumulative total also includes patients treated by the PRCS health teams/BHU in Karachi (Sindh), Thatta (Sindh), Pasni (Balochistan) and Ormara (Balochistan).

## Pakistan: Cyclone Yemyin/Floods; Appeal No. MDRPK001 (Revised); Operations Update No. 5

in Nokalat village by restoring 80 feet of damaged water pipeline. Assessments for water supply systems are also being conducted in villages of Gokdan union council. The local government in Turbat has requested the PRCS to help with the installation of a water treatment plant donated by the French government.

The two-member Federation team in Turbat procured and installed four water pumps and tanks in four communities of Koshkalat union council in Kech District between 28 June and 2 July, thus providing drinkable water to 782 families. The team also supplied two 125-litre water tanks to two schools in Turbat town which are currently being used as relief centres for floods-displaced people.

**Objective 3 (Non-food items): The ability of 18,000 flood affected families in Balochistan and Sindh provinces to cope in a post-flood situation is improved through provision of relief non-food items for one month.**

### Achievements:

The PRCS Balochistan provincial branch completed the distribution of non-food items to 1,000 families in Kharan on 21 July. The items distributed comprise tents, blankets, jerry cans, plastic sheeting and hygiene kits. The PRCS/Federation relief team in Turbat is carrying out assessments for non-food items in Koshkalat and Gokdan union councils. The Turbat team has received non-food items from the PRCS national headquarters. The items comprise of 2,000 tents, 4,000 blankets, 2,000 hygiene kits and 2,000 jerry cans. The PRCS Sindh provincial branch has distributed relief items to 110 families in Kamar and Dadu.

As a start to the response, non-food items in PRCS disaster preparedness stocks are being mobilized. To date, the PRCS national headquarters has positioned the following stocks in various key branches: 18,519 blankets, 6,161 plastic tarpaulin sheets, 5,956 jerry cans, 1,698 kitchen sets, 25,000 stoves, 25,000 hygiene kits, and 1,300 quilts.

The PRCS has distributed the following relief items to about 2,410 families:

Items	Sindh	Balochistan	Total
Blankets	1,593	2,000	3,593
Kitchen sets	740	0	740
Plastic sheeting	361	1,100	1,461
Stoves	148	0	148
Hygiene kits	739	1,000	1,739
Jerry cans	368	1,100	1,468

**Objective 4 (Shelter): The ability of 18,000 floods-affected families in Balochistan and Sindh provinces to cope in a post-flood is improved through provision of shelter items for one month.**

### Achievements:

The Federation Pakistan delegation has started the procurement process for shelter kit items to assist 18,000 families. Each shelter kit will be made up of two plastic tarpaulin sheets (6m x 4m size), one mat, eight bamboo poles, one roll of rope (20 metres), one roll of twine, one saw, one shovel and one plastic bucket. The PRCS placed more than 10,000 tents in strategic places for distribution to the flood-affected people. Out of those 3,301 (322 in Sindh and 2,979 in Balochistan) have already been distributed.

**Objective 5 (supplementary food): The immediate supplementary food needs of 11,000 flood-affected families in Balochistan and Sindh Provinces are met within one month, thus supporting them to focus on rebuilding their lives.**

### Achievements:

To date, the PRCS/Federation relief teams have distributed a total of 11,725 food parcels. Each food parcel comprises rice (10 kg), lentils (2kg), sugar (2kg), salt (1kg), ghee (2 kg), tea (400gm) and one pack of matches. The PRCS Sindh provincial branch distributed 1,200

Pakistan Red Crescent Society distributed food items to over 3,000 affected families in Kech District, Balochistan. Federation.

## Pakistan: Cyclone Yemyin/Floods; Appeal No. MDRPK001 (Revised); Operations Update No. 5

food parcels in Kamar and Dadu between 19 to 21 July while the PRCS Balochistan provincial branch completed the distribution of 1,000 food parcels in Kharan on 21 July.

Earlier, the PRCS/Federation team in Turbat completed the distribution of 3,000 food parcels on 18 July. The PRCS Punjab provincial branch distributed a total of 4,000 food parcels in the coastal town of Pasni in Balochistan. Additionally, 500 rice packs were distributed in the districts of Dadu and Thatta by the PRCS Sindh branch by 5 July.

**Objective 6: The profile of the Red Cross Red Crescent response to the floods has been increased thus contributing to effective communication of the needs of the most vulnerable flood-affected people.**

### Achievements:

The Federation Pakistan delegation communications consultant has been deployed with the British and Spanish Red Cross ERUs to provide appropriate coverage. The consultant will also be in contact with the Finnish Red Cross health ERU in Larkana. The Federation information officer, who was based in Turbat, has returned to Islamabad and will be contacting local and international media in the city to pitch PRCS/Federation flood operation stories.

The communications team in the country has posted five information bulletins since 25 June 2007. Information is also being shared with the International Committee of the Red Cross, partner national societies in the country, UN agencies and the national media through regular e-mails and during cluster meetings. Public Federation documents on the flood operation are also being disseminated through the Pakistan Floods Information Centre website (<http://pfic.webexone.com>) on a regular basis. Additionally, Red Cross Red Crescent publications are being distributed to web-based media, including Reliefweb (<http://www.reliefweb.int/>) and Reuters AlterNet (<http://www.alertnet.org>).

### Overall operational constraints

The ERUs are facing difficulties in finding the most suitable site to set up base so that they can serve the community better. This is because the affected population is scattered all over. Inaccessibility has also posed a major challenge for the operation. The PRCS is overwhelmed by the emergency; hence it is tough to get the health teams mobilized to the field.

### Coordination

The PRCS and the Federation delegation in the country are coordinating frequently with the government (through NDMA) and other UN agencies. The PRCS national headquarters is also carrying out regular coordination with all its provincial branches. NDMA continues to provide updates and conducts regular meetings with various stakeholders on a regular basis. The PRCS participates actively in these meetings.

A cluster system was established on 2 July to promote a coordinated response. Currently, there are 12 clusters in place: shelter, health, food, logistics, water sanitation and hygiene, education, protection, early recovery, communications, camp management, nutrition and IT/telecommunications. The Federation, through FACT, the head of delegation and other staff, regularly attends the various coordination meetings. The Federation/PRCS are also sharing information on the three W's of who, where and what.

#### What is a cluster?

The Cluster Approach is one element of humanitarian reform that aims to strengthen overall response capacity and the effectiveness of the response(s) through partnerships. Refer to: <http://www.humanitarianreform.org/humanitarianreform/Default.aspx?tabid=70>.

The Federation has made a commitment to provide leadership to the broader humanitarian community in Emergency Shelter in disaster situations, to consolidate best practice, map capacity and gaps, and lead coordinated response. The Federation has committed to being a 'convener' rather than a 'cluster lead'. *It has therefore not committed to being 'provider of last resort' nor is it accountable to any part of the UN system.*

In the context of this approach agreed to at the global level, in the humanitarian's community's response to the Pakistan floods, the Federation has assumed the role of shelter cluster convener, with early recovery aspects coordinated by UN-Habitat. The Federation's role as convener is independent from its normal operations in Pakistan. Coordination sub-offices are being established in Quetta and Karachi.

## **Pakistan: Cyclone Yemyin/Floods; Appeal No. MDRPK001 (Revised); Operations Update No. 5**

### **Monitoring and evaluation**

The Federation reporting team will, from now on, be issuing one operations update per week. Four updates have been issued since the start of the operation.

### **Logistics**

Two members of logistics ERU (Swiss Red Cross) have arrived in country. One member has proceeded to Larkana (Sind) to assess logistical requirements. The equipment for the Finnish Red Cross ERU was cleared by the Federation logistics team and has been sent to Larkana. The equipment for British and Spanish Red Cross ERUs has arrived Karachi and the clearance process is on track.

At the moment seven Federation vehicles have been deployed for use in the floods operation. Four more vehicles are being sent from Islamabad to Jhal Magsi via Quetta for use in the flood related relief/health activities. The Federation logistics team in Karachi is utilizing eight rented vehicles in this operation. A warehouse has been identified in Karachi while the following non-food items have reached Karachi via road from the Federation stocks in Mansehra (NWFP): 18,000 blankets, 8,000 buckets, 7,000 plastic tarpaulin sheets and 6,000 hurricane lamps. The logistics team has sent a request for 36,000 mosquito nets and 18,000 plastic tarpaulin sheets, which will arrive from Dubai and Kuala Lumpur by sea. Vehicles (land cruisers) for the ERUs will be arriving in Karachi in the form of two plain loads in the coming days.

A mobilization table is available on the Federation's Disaster Management Information System (DMIS) at: <https://www-secure.ifrc.org/dmis/admin/logistics/docs/Mobtable%20Pakistan%20190707.pdf>

### **Security**

The overall security situation remains a significant concern in Pakistan, following the surge in violence since the Red Mosque incidents. There have been almost daily incidents of violent attacks, including suicide bomb explosions across the country, particularly along the western region bordering Afghanistan. Security installations are increasingly vulnerable to such attacks, and these incidents also erode the public confidence in the law and order and state security apparatus. In the midst of this situation, NGOs working in the NWFP last week expressed strong concern over their ability to remain fully operational.

The government continues to monitor the movement of all international staff to ensure safety. Federation teams have been issued with specific security regulations and the Team Leader as well as the Federation's Country Representative and Security Delegate is closely monitoring the situation. Low personal profile and high institutional focus and security awareness is maintained, and so far no security incidents involving the Red Cross and Red Crescent have been reported. Indications so far show that the humanitarian response is generally valued and our work is reported to be well received – an important part of the Federation's security strategy (acceptance). Given the expectations, however, that the security concerns and risks will continue to mount, the Federation will maintain movement restrictions, subject to adjustments on a day-to-day basis. International delegates will be required to keep a low profile, and in general to be cautious and alert. Red Cross and Red Crescent delegates are advised to vary routes and times when driving in the region, and are told to expect road checkpoints and traffic disruptions throughout Islamabad, with cellular phone service potentially disrupted.

Latest reports are that Federation expatriates have returned to Mansehra (though they will remain in Mansehra and not travel further into the field) and PRCS/Federation commenced operations in Mansehra and Balakot on 23 July. The police in Besham and Batagram have asked NGOs/INGOs to wait for at least a week before resuming operations. A three member Federation team went to Banna on 19 and 20 July to conduct a preliminary assessment so as to secure the camp. The team also met with the local authorities.

Given that the security situation in the flood-affected areas of Balochistan remains a concern, the Federation Pakistan Delegation security delegate will visit the area in the coming days to assess the situation and to meet with focal security and emergency services personnel.

For additional security updates, contact the Federation Security Delegate in Pakistan: Thor Thorbro; Mobile: +92.(0)300.555.4506; Thuraya: +88216.89804431; email: [thor.thorbro@ifrc.org](mailto:thor.thorbro@ifrc.org)

## How we work

All International Federation assistance seeks to adhere to the [Code of Conduct for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations \(NGO's\) in Disaster Relief](#) and is committed to the [Humanitarian Charter and Minimum Standards in Disaster Response \(Sphere\)](#) in delivering assistance to the most vulnerable.

### The Federation's Global Agenda

The International Federation's activities are aligned with under a Global Agenda, which sets out **four broad goals** to meet the Federation's mission to "improve the lives of vulnerable people by mobilizing the power of humanity".

### Global Agenda Goals:

- Reduce the numbers of deaths, injuries and impact from disasters.
- Reduce the number of deaths, illnesses and impact from diseases and public health emergencies.
- Increase local community, civil society and Red Cross Red Crescent capacity to address the most urgent situations of vulnerability.
- Reduce intolerance, discrimination and social exclusion and promote respect for diversity and human dignity.
